UNIVERSITY PRESS

# Journal of MATERIALS RESEARCH

Volume 28, Number 6, March 28, 2013

## ARTICLES

- |         |  |   |
|---------|--|---|
| 789–797 | Evaluating initial unloading stiffness from elastic work-of-indentation measured in a nanoindentation experiment   | Kaushal K. Jha, Nakin Suksawang, Debrupa Lahiri, Arvind Agarwal               |
| 798–805 | Effect of special rotational deformation on dislocation emission from a semielliptical blunt crack tip in nanocrystalline solids                           | Min Yu, Qihong Fang, Hui Feng, Youwen Liu                                     |
| 806–816 | Indentation method for measuring the viscoelastic kernel function of nonlinear viscoelastic soft materials   | Yan-Ping Cao, Man-Gong Zhang, Xi-Qiao Feng                                    |
| 817–823 | Application of hydrothermally synthesized zinc oxide nanorods in quantum dots-sensitized solar cells   | Sheng He, Xiaoping Zou, Zhe Sun, Gongqing Teng, Chuan Zhao                    |
| 824–831 | Facile synthesis and electrochemical properties of alpha-phase ferric oxide hematite cocoons and rods as high-performance anodes for lithium-ion batteries | Wei An Ang, Nutan Gupta, Raghavan Prasanth, Huey Hoon Hng, Srinivasan Madhavi |
| 832–839 | Comparison of structure and electrochemical properties for PANI/TiO <sub>2</sub> /G and PANI/G composites synthesized by mechanochemical route             | Ruxangul Jamal, Weiwei Shao, Feng Xu, Tursun Abdiryim                         |
| 840–847 | Enhancement of microwave absorption of polyaniline–PbTiO <sub>3</sub> composites prepared by using sodium dodecyl benzene sulfonic acid                    | Ameena Parveen, Aashis S. Roy   |
| 848–855 | Controlled synthesis of ytterbium ion and erbium ion codoped gadolinium oxyfluoride hollow nanosphere with upconversion luminescence property              | Yu Wang, Tong Liu, Xuesi Wang, Hongwei Song                                   |
| 856–862 | Synthesis and photoluminescent properties of nanoerythrocyte-shaped ytterbium orthovanadate and erbium ion-doped ytterbium orthovanadate powders           | Youjin Zhang, Hongmei He, Ao Zheng, Yun Fan                                   |
| 863–872 | Synthesis of Pt–OMG mesoporous composite via nanocasting and chemical vapor infiltration   | Hoi Yung, Kwong-Yu Chan, Frank Leung-Yuk Lam                                  |
| 873–886 | The microstructural evolution and thermal stability of nanocrystalline ball-milled Ni–15 at.% W powder   | Gayatri K. Rane, Daniel Apel, Udo Welzel, Eric Jan Mittemeijer                |
| 887–896 | A comparative study of Y <sup>3+</sup> - or/and La <sup>3+</sup> -doped CeO <sub>2</sub> –ZrO <sub>2</sub> -based solid solution                           | Jiaxiu Guo, Zhonghua Shi, Dongdong Wu, Huaqiang Yin, Yaoqiang Chen            |
| 897–904 | A feasible route to prepare hollow ZnO microtube via modulating reagent's vapor pressure and growth temperature  | Youguo Yan, Lixia Zhou, Jun Zhang, Songqing Hu, Shuangqing Sun                |

## ERRATUM

- |         |   |   |
|---------|---|---|
| 905–906 | CdS-sensitized single-crystalline TiO <sub>2</sub> nanorods and polycrystalline nanotubes for solar hydrogen generation – ERRATUM | Ulugbek Shaislamov, Bee Lyong Yang  |
| 907     | Symmetrically abrupt GaN/AlGaN superlattices by alternative interface–interruption scheme – ERRATUM                               | Xiaohong Chen, Na Lin, Duanjun Cai, Yong Zhang, Hangyang Chen, Junyong Kang |
