Journal of Optimization Theory and Applications

Volume 159 · Number 1 · October 2013

First- and Second-Order Optimality Conditions for Optimal Control Problems of State Constrained Integral Equations

J.F. Bonnans · C. de la Vega · X. Dupuis 1

Linear Complementarity Problem with Pseudomonotonicity on Euclidean Jordan Algebras

J. Tao 41

Moment Approximations for Set-Semidefinite Polynomials

P.J.C. Dickinson · J. Povh 57

A Unified Approach for Constrained Extremum Problems: Image Space Analysis

J. Li · S.Q. Feng · Z. Zhang 69

Further Discussion on the Error Bound for Generalized Linear Complementarity Problem over a Polyhedral Cone

H. Sun · Y. Wang 93

An Inexact Steepest Descent Method for Multicriteria Optimization on Riemannian Manifolds

G.C. Bento · J.X. da Cruz Neto · P.S.M. Santos 108

A Subgradient Method for Multiobjective Optimization on Riemannian Manifolds

G.C. Bento · J.X. Cruz Neto 125

A Parallel Splitting Method for Separable Convex Programs

K. Wang · D.R. Han · L.L. Xu 138

Another Conjugate Gradient Algorithm with Guaranteed Descent and Conjugacy Conditions for Large-scale Unconstrained Optimization

N. Andrei 159

Highly Accurate Analytic Approximation to the Gaussian Q -function Based on the Use of Nonlinear Least Squares Optimization Algorithm

I. Develi · A. Basturk 183

Projection Method Approach for General Regularized Non-convex Variational Inequalities

J. Balooce 192

A New Mixed Iterative Algorithm to Solve the Fuel-Optimal Linear Impulsive Rendezvous Problem

D. Arzelier · C. Louembet · A. Rondepierre · M. Kara-Zaitri 210

**Approximate Controllability of the Magnetohydrodynamic Equations
on the Three-Dimensional Torus**

I.C. Galan 231

**Numerical Methods for Optimal Dividend Payment and Investment Strategies of
Markov-Modulated Jump Diffusion Models with Regular and Singular Controls**

Z. Jin · G. Yin 246

Robust Multiple Objective Game Theory

H. Yu · H.M. Liu 272

Some Results on Best Proximity Points

B. Samet 281

**Comments on Some Recent Results on Controllability of Abstract Differential
Problems**

E. Hernández · D. O'Regan · K. Balachandran 292
