December 27, 2013: Vol. 117, Iss. 51
Pages 16369-16610

Content

- 1. The Intersection of Interfacial Forces and Electrochemical Reactions**
Jacob N. Israelachvili, Kai Kristiansen, Matthew A. Gebbie, Dong Woog Lee, Stephen H. Donaldson, Jr., Saurabh Das, Michael V. Rapp, Xavier Banquy, Markus Valtiner, and Jing Yu
The Journal of Physical Chemistry B **2013** 117 (51), 16369-16387
- 2. Refined OPLS All-Atom Force Field Parameters for n-Pentadecane, Methyl Acetate, and Dimethyl Phosphate**
Krzysztof Murzyn, Maciej Bratek, and Marta Pasenkiewicz-Gierula
The Journal of Physical Chemistry B **2013** 117 (51), 16388-16396
- 3. Impact of DNA Environment on the Intrastrand Cross-Link Lesions: Hydrogen Atom Release as the Last Step of Formation of G[8-5m]T**
José Pedro Cerón-Carrasco, Denis Jacquemin, and Elise Dumont
The Journal of Physical Chemistry B **2013** 117 (51), 16397-16404
- 4. Stimulated Emission Properties of Fluorophores by CW-STED Single Molecule Spectroscopy**
Margaux Bouzin, Giuseppe Chirico, Laura D'Alfonso, Laura Sironi, Giancarlo Soavi, Giulio Cerullo, Barbara Campanini, and Maddalena Collini
The Journal of Physical Chemistry B **2013** 117 (51), 16405-16415
- 5. Pseudo-Rephasing and Pseudo-Free-Induction-Decay Mechanism in Two-Color Three-Pulse Photon Echo of a Binary System**
Hui Dong, Ian Seungwan Ryu, and Graham R. Fleming
The Journal of Physical Chemistry B **2013** 117 (51), 16416-16421

- 6. Excited State Dynamics of Photoswitchable Fluorescent Protein Padron**
Eduard Fron, Mark Van der Auweraer, Johan Hofkens, and Peter Dedecker
The Journal of Physical Chemistry B **2013** 117 (51), 16422-16427
- 7. Solvation Free Energies of Alanine Peptides: The Effect of Flexibility**
Hironori Kokubo, Robert C. Harris, Dilipkumar Asthagiri, and B. Montgomery Pettitt
The Journal of Physical Chemistry B **2013** 117 (51), 16428-16435
- 8. 5-Methylation of Cytosine in CG:CG Base-Pair Steps: A Physicochemical Mechanism for the Epigenetic Control of DNA Nanomechanics**
Tahir I. Yusufaly, Yun Li, and Wilma K. Olson
The Journal of Physical Chemistry B **2013** 117 (51), 16436-16442
- 9. Understanding Selectin Counter-Receptor Binding from Electrostatic Energy Computations and Experimental Binding Studies**
Anna Lena Woelke, Christian Kuehne, Tim Meyer, Gegham Galstyan, Jens Dervedde, and Ernst-Walter Knapp
The Journal of Physical Chemistry B **2013** 117 (51), 16443-16454
- 10. Identifying, By First-Principles Simulations, Cu[Amyloid- β] Species Making Fenton-Type Reactions in Alzheimer's Disease**
Giovanni La Penna, Christelle Hureau, Oliviero Andreussi, and Peter Faller
The Journal of Physical Chemistry B **2013** 117 (51), 16455-16467
- 11. Infrared Spectroscopy of Nicotinamide Adenine Dinucleotides in One and Two Dimensions**
Niall Simpson, Daniel J. Shaw, Pim W. J. M. Frederix, Audrey H. Gillies, Katrin Adamczyk, Gregory M. Greetham, Michael Towrie, Anthony W. Parker, Paul A. Hoskisson, and Neil T. Hunt
The Journal of Physical Chemistry B **2013** 117 (51), 16468-16478
- 12. How Ions Affect the Structure of Water: A Combined Raman Spectroscopy and Multivariate Curve Resolution Study**
Mohammed Ahmed, V. Namboodiri, Ajay K. Singh, Jahur A. Mondal, and Sisir K. Sarkar
The Journal of Physical Chemistry B **2013** 117 (51), 16479-16485
- 13. Terahertz Spectral Domain Computational Analysis of Hydration Shell of Proteins with Increasingly Complex Tertiary Structure**
Oleksandr Sushko, Rostyslav Dubrovka, and Robert S. Donnan
The Journal of Physical Chemistry B **2013** 117 (51), 16486-16492
- 14. A Mixed Quantum-Classical Molecular Dynamics Study of anti-Tetrol and syn-Tetrol Dissolved in Liquid Chloroform: Hydrogen-Bond Structure and Its Signature on the Infrared Absorption Spectrum**
Kijeong Kwac and Eitan Geva
The Journal of Physical Chemistry B **2013** 117 (51), 16493-16505
- 15. Saturation Behavior in X-ray Raman Scattering Spectra of Aqueous LiCl**
Iina Juurinen, Tuomas Pylkkänen, Kari O. Ruotsalainen, Christoph J. Sahle, Giulio Monaco, Keijo Hämäläinen, Simo Huotari, and Mikko Hakala
The Journal of Physical Chemistry B **2013** 117 (51), 16506-16511

- 16. From Ligand Fields to Molecular Orbitals: Probing the Local Valence Electronic Structure of Ni²⁺ in Aqueous Solution with Resonant Inelastic X-ray Scattering**
Kristjan Kunnus, Ida Josefsson, Simon Schreck, Wilson Quevedo, Piter S. Miedema, Simone Techert, Frank M. F. de Groot, Michael Odelius, Philippe Wernet, and Alexander Föhlisch
The Journal of Physical Chemistry B **2013** 117 (51), 16512-16521
- 17. Ab Initio Molecular Dynamics Simulation of Proton Hopping in a Model Polymer Membrane**
Ram Devanathan, Nagesh Idupulapati, Marcel D. Baer, Christopher J. Mundy, and Michel Dupuis
The Journal of Physical Chemistry B **2013** 117 (51), 16522-16529
- 18. Hydrogen Atom in Water from Ambient to High Temperatures**
Anna Pomogaeva and Daniel M. Chipman
The Journal of Physical Chemistry B **2013** 117 (51), 16530-16541
- 19. Modeling Excluded Volume Effects for the Faithful Description of the Background Signal in Double Electron–Electron Resonance**
Daniel R. Kattnig, Jörg Reichenwallner, and Dariush Hinderberger
The Journal of Physical Chemistry B **2013** 117 (51), 16542-16557
- 20. The Attachment Affinity of Hemoglobin toward Silver-Containing Bioactive Glass Functionalized with Glutaraldehyde**
C. Gruian, A. Vulpoi, E. Vanea, B. Oprea, H.-J. Steinhoff, and S. Simon
The Journal of Physical Chemistry B **2013** 117 (51), 16558-16564
- 21. Probing the Contribution of Different Intermolecular Forces to the Adsorption of Spheroproteins onto Hydrophilic Surfaces**
João Borges, José M. Campiña, and A. Fernando Silva
The Journal of Physical Chemistry B **2013** 117 (51), 16565-16576
- 22. Ionic Conductivity of Mixed Glass Former 0.35Na₂O + 0.65[xB₂O₃ + (1 – x)P₂O₅] Glasses**
Randilynn Christensen, Garrett Olson, and Steve W. Martin
The Journal of Physical Chemistry B **2013** 117 (51), 16577-16586
- 23. FCS Study of the Structural Stability of Lysozyme in the Presence of Morpholinium Salts**
Ashok Pabbathi, Shalini Ghosh, and Anunay Samanta
The Journal of Physical Chemistry B **2013** 117 (51), 16587-16593
- 24. Structure of Glasses in the Pseudobinary System Ga₂Se₃–GeSe₂: Violation of Chemical Order and 8-N Coordination Rule**
A. W. Mao, B. G. Aitken, R. E. Youngman, D. C. Kaseman, and S. Sen
The Journal of Physical Chemistry B **2013** 117 (51), 16594-16601
- 25. Depletion Flocculation Induced by Synergistic Effects of Nanoparticles and Polymers**
Shunxi Ji and John Y. Walz
The Journal of Physical Chemistry B **2013** 117 (51), 16602-16609
