THE JOURNAL OF PHYSICAL CHEMISTRY A

February 5, 2015: Vol. 119, Iss. 5

Content

1. Direct Dynamics Simulation of Dissociation of the [CH₃--I--OH]⁻ Ion-Molecule Complex

Jing Xie, Miranda McClellan, Rui Sun, Swapnil C. Kohale, Niranjan Govind, and William L. Hase
The Journal of Physical Chemistry A 2015 119 (5), 817-825

2. Mode Specificity in the HCl + OH → Cl + H₂O Reaction: Polanyi's Rules vs Sudden Vector Projection Model

Hongwei Song and Hua Guo
The Journal of Physical Chemistry A 2015 119 (5), 826-831

3. Excited State Proton Transfer Dynamics of Thioacetamide in S₂(ππ*) State: Resonance Raman Spectroscopic and Quantum Mechanical Calculations Study

Xiao Chen, Yanying Zhao, Haibo Zhang, Jiadan Xue, and Xuming Zheng
The Journal of Physical Chemistry A 2015 119 (5), 832-842

4. Structures of [CoO(CO₂)_n]⁻ and [NiO(CO₂)_n]⁻ Clusters Studied by Infrared Spectroscopy

Benjamin J. Knurr and J. Mathias Weber
The Journal of Physical Chemistry A 2015 119 (5), 843-850

5. Structural Study of Various Substituted Biphenyls and Their Radical Anions Based on Time-Resolved Resonance Raman Spectroscopy Combined with Pulse Radiolysis

Jungkweon Choi, Dae Won Cho, Sachiko Tojo, Mamoru Fujitsuka, and Tetsuro Majima
The Journal of Physical Chemistry A 2015 119 (5), 851-856

6. Simplified Cartesian Basis Model for Intrapolyad Emission Intensities in the Bent-to-Linear Electronic Transition of Acetylene

G. Barratt Park, Adam H. Steeves, Joshua H. Baraban, and Robert W. Field
The Journal of Physical Chemistry A 2015 119 (5), 857-865

7. Photoelectron Spectrum and Dynamics of the Uracil Cation

Mariana Assmann, Horst Köppel, and Spiridoula Matsika
The Journal of Physical Chemistry A 2015 119 (5), 866-875

8.Theoretical Study of Singlet Oxygen Molecule Generation via an Exciplex with Valence-Excited Thiophene

Masato Sumita and Kenji Morihashi
The Journal of Physical Chemistry A 2015 119 (5), 876-883

9.The Temperature Dependent Photoswitching of a Classic Diarylethene Monitored by in Situ X-ray Diffraction

Jordan M. Cox, Ian M. Walton, Dinesh G. (Dan) Patel, Mengyang Xu, Yu-Sheng Chen, and Jason B. Benedict
The Journal of Physical Chemistry A 2015 119 (5), 884-888

10.Prediction of Nonradical Au(0)-Containing Precursors in Nanoparticle Growth Processes

Brian M. Barnsgrover, Timothy J. Manges, and Christine M. Aikens
The Journal of Physical Chemistry A 2015 119 (5), 889-895

11.Computational Methodology Study of the Optical and Thermochemical Properties of a Molecular Photoswitch

Stine T. Olsen, Jonas Elm, Freja Eilsø Storm, Aske Nørskov Gejl, Anne S. Hansen, Mia Harring Hansen, Jens Rix Nikolajsen, Mogens Brøndsted Nielsen, Henrik G. Kjaergaard, and Kurt V. Mikkelsen
The Journal of Physical Chemistry A 2015 119 (5), 896-904

12.Confirmation of the Molecular Structure of Tetramethylene Diperoxide Dicarbamide (TMDD) and Its Sensitiveness Properties

Mark Fitzgerald, Michael G. Gardiner, David Armitt, Gregory W. Dicinoski, and Craig Wall
The Journal of Physical Chemistry A 2015 119 (5), 905-910

13.Assessment of Several DFT Functionals in Calculation of the Reduction Potentials for Ni-, Pd-, and Pt-Bis-ethylene-1,2-dithiolene and -Diselenolene Complexes

Eric A. C. Bushnell and Russell J. Boyd
The Journal of Physical Chemistry A 2015 119 (5), 911-918

14.Bonding in Nitroxide Spin Labels from ^{14}N Electric–Quadrupole Interactions

Derek Marsh
The Journal of Physical Chemistry A 2015 119 (5), 919-921

15.Terminus $\text{U}\equiv\text{E}$ ($\text{E} = \text{N}, \text{P}, \text{As}, \text{Sb}$, and Bi) Bonds in Uranium Complexes: A Theoretical Perspective

Qun-Yan Wu, Jian-Hui Lan, Cong-Zhi Wang, Yu-Liang Zhao, Zhi-Fang Chai, and Wei-Qun Shi
The Journal of Physical Chemistry A 2015 119 (5), 922-930

16. Correction to “Activation Barriers in the Growth of Molecular Clusters Derived From Sulfuric Acid and Ammonia”

Joseph W. DePalma, Bryan R. Bzdek, Douglas P. Ridge, and Murray V. Johnston
The Journal of Physical Chemistry A **2015** *119* (5), 931-932
