February 12, 2015: Vol. 119, Iss. 6

Content

- 1. Theoretical Study of the Reaction Kinetics of Atomic Bromine with Tetrahydropyran**
Binod Raj Giri, John M. H. Lo, John M. Roscoe, Awad B. S. Alquaity, and Aamir Farooq
The Journal of Physical Chemistry A 2015 119 (6), 933-942
DOI: 10.1021/jp510987q
- 2. Mechanism and Kinetic Modeling of Hydrogenation in the Organic Getter/Palladium Catalyst/Activated Carbon Systems**
L. N. Dinh, G. A. Cairns, R. A. Strickland, W. McLean, II, and R. S. Maxwell
The Journal of Physical Chemistry A 2015 119 (6), 943-951
DOI: 10.1021/jp511052a
- 3. Kinetics and Product Branching Fractions of Reactions between a Cation and a Radical: $\text{Ar}^+ + \text{CH}_3$ and $\text{O}_2^+ + \text{CH}_3$**
Jordan C. Sawyer, Nicholas S. Shuman, Justin P. Wiens, and Albert A. Viggiano
The Journal of Physical Chemistry A 2015 119 (6), 952-958
DOI: 10.1021/jp511500k
- 4. Solvent-Dependent Dynamics of a Series of Rhenium Photoactivated Catalysts Measured with Ultrafast 2DIR**
Laura M. Kiefer and Kevin J. Kubarych
The Journal of Physical Chemistry A 2015 119 (6), 959-965
DOI: 10.1021/jp511686p
- 5. Low-Temperature NMR Characterization of Reaction of Sodium Pyruvate with Hydrogen Peroxide**
Christopher Asmus, Olivier Mozziconacci, and Christian Schöneich
The Journal of Physical Chemistry A 2015 119 (6), 966-977
DOI: 10.1021/jp511831b
- 6. Combustion Chemistry via Metadynamics: Benzyl Decomposition Revisited**
Daniela Polino and Michele Parrinello
The Journal of Physical Chemistry A 2015 119 (6), 978-989
DOI: 10.1021/jp5118807
- 7. On Surface Hopping and Time-Reversal**
Joseph E. Subotnik and Young Min Rhee
The Journal of Physical Chemistry A 2015 119 (6), 990-995
DOI: 10.1021/jp512024w
- 8. NMR Signal Enhancement for Hyperpolarized Fluids Continuously Generated in Hydrogenation Reactions with Parahydrogen**
Danila A. Barskiy, Oleg G. Salnikov, Kirill V. Kovtunov, and Igor V. Koptuyug
The Journal of Physical Chemistry A 2015 119 (6), 996-1006
DOI: 10.1021/jp510572d
- 9. Complexation of Allyl Radicals and Hydrochloric Acid in Helium Nanodroplets**
Daniel Leicht, Daniel Habig, Gerhard Schwaab, and Martina Havenith
The Journal of Physical Chemistry A 2015 119 (6), 1007-1012
DOI: 10.1021/jp511708s
- 10. Spectroscopic and Theoretical Studies of Acid–Base Behaviors of N-Confused Porphyrins: Effects of meso-Aryl Substituents**
Ryuichi Sakashita, Masatoshi Ishida, and Hiroyuki Furuta

The Journal of Physical Chemistry A 2015 119 (6), 1013-1022

DOI: 10.1021/jp512229k

11. High-Level Ab Initio Computations of the Absorption Spectra of Organic Iridium Complexes

Felix Plasser and Andreas Dreuw

The Journal of Physical Chemistry A 2015 119 (6), 1023-1036

DOI: 10.1021/jp5122917

12. Three Conformers of 2-Furoic Acid: Structure Changes Induced with Near-IR Laser Light

Anna Halasa, Leszek Lapinski, Igor Reva, Hanna Rostkowska, Rui Fausto, and Maciej J. Nowak

The Journal of Physical Chemistry A 2015 119 (6), 1037-1047

DOI: 10.1021/jp512302s

13. High-Resolution Millimeter Wave Spectroscopy and Ab Initio Calculations of Aminomalononitrile

Roman A. Motiyenko, Laurent Margulès, Eugen A. Alekseev, and Jean-Claude Guillemin

The Journal of Physical Chemistry A 2015 119 (6), 1048-1054

DOI: 10.1021/jp512625s

14. Reoxidation of Photoreduced Polyoxotungstate ([PW12O40]4-) by Different Oxidants in the Presence of a Model Pollutant. Kinetics and Reaction Mechanism

Bing Yang, Joseph J. Pignatello, Dong Qu, and Baoshan Xing

The Journal of Physical Chemistry A 2015 119 (6), 1055-1065

DOI: 10.1021/jp510036x

15. Effect of H₂ Binding on the Nonadiabatic Transition Probability between Singlet and Triplet States of the [NiFe]-Hydrogenase Active Site

Danil S. Kaliakin, Ryan R. Zaari, and Sergey A. Varganov

The Journal of Physical Chemistry A 2015 119 (6), 1066-1073

DOI: 10.1021/jp510522z

16. Role of Topological Charge Stabilization in Protomeric Tautomerism

Masashi Hatanaka

The Journal of Physical Chemistry A 2015 119 (6), 1074-1086

DOI: 10.1021/acs.jpca.5b00133
