SPECIAL SECTION ON CONDENSED MATTER ANALOGUES OF COSMOLOGY

PREFACE

- 400301 Condensed matter analogues of cosmology**
Tom Kibble and Ajit Srivastava

SPECIAL SECTION PAPERS

- 404201 Symmetry breaking in nematic liquid crystals: analogy with cosmology and magnetism**
R Repnik, A Ranjkesh, V Simonka, M Ambrozic, Z Bradac and S Kralj
- 404202 Morphogenesis of defects and tactoids during isotropic–nematic phase transition in self-assembled lyotropic chromonic liquid crystals**
Young-Ki Kim, Sergij V Shiyonovskii and Oleg D Lavrentovich
- 404203 Annihilation dynamics of stringlike topological defects in a nematic lyotropic liquid crystal**
R R Guimarães, R S Mendes, P R G Fernandes and H Mukai
- 404204 Duality between the dynamics of line-like brushes of point defects in 2D and strings in 3D in liquid crystals**
Sanatan Digal, Rajarshi Ray, P S Saumia and Ajit M Srivastava
- 404205 The multiuniverse transition in superfluid ^3He**
Yury Bunkov
- 404206 Coherent topological defect dynamics and collective modes in superconductors and electronic crystals**
D Mihailovic, T Mertelj, V V Kabanov and S Brazovskii
- 404207 Gaussianity revisited: exploring the Kibble–Zurek mechanism with superconducting rings**
D J Weir, R Monaco, V P Koshelets, J Mygind and R J Rivers
- 404208 The Kibble–Zurek mechanism in a subcritical bifurcation**
M A Miranda, D Laroze and W González-Viñas
- 404209 Topological relics of symmetry breaking: winding numbers and scaling tilts from random vortex–antivortex pairs**
W H Zurek
- 404210 Causality and non-equilibrium second-order phase transitions in inhomogeneous systems**
A del Campo, T W B Kibble and W H Zurek
- 404211 The role of causality in tunable Fermi gas condensates**
Jen-Tsung Hsiang, Chi-Yong Lin, Da-Shin Lee and Ray J Rivers
- 404212 Kibble–Zurek mechanism in a trapped ferromagnetic Bose–Einstein condensate**
Hiroki Saito, Yuki Kawaguchi and Masahito Ueda
- 404213 D-brane solitons and boojums in field theory and Bose–Einstein condensates**
Kenichi Kasamatsu, Hiromitsu Takeuchi and Muneto Nitta
- 404214 Kibble–Zurek scaling and string-net coarsening in topologically ordered systems**
Anushya Chandran, F J Burnell, Vedika Khemani and S L Sondhi
- 404215 Universal frozen spectra after time-dependent symmetry restoring phase transitions**
Friedemann Queisser, Patrick Navez and Ralf Schützhold

(Continued overleaf)

- 404216** **Microscopic theory of non-adiabatic response in real and imaginary time**
C De Grandi, A Polkovnikov and A W Sandvik

PAPERS

NANOSTRUCTURES AND NANOELECTRONICS

- 405301** **Diffusion and desorption of oxygen atoms on graphene**
Yafei Dai, Shuang Ni, Zhenyu Li and Jinlong Yang

ELECTRONIC STRUCTURE

- 405501** **A hybrid density functional view of native vacancies in gallium nitride**
Roland Gillen and John Robertson

CORRELATED ELECTRONS

- 405601** **First-principles Wannier function analysis of the electronic structure of PdTe: weaker magnetism and superconductivity**
Chinedu E Ekuma, Chia-Hui Lin, Juana Moreno, Wei Ku and Mark Jarrell

MAGNETISM AND MAGNETIC MATERIALS

- 406001** **Magnetic domain patterns on strong perpendicular magnetization of Co/Ni multilayers as spintronics materials: I. Dynamic observations**
Masahiko Suzuki, Kazue Kudo, Kazuki Kojima, Tsuneo Yasue, Noriko Akutsu, Wilson Agerico Diño, Hideaki Kasai, Ernst Bauer and Takanori Koshikawa
- 406002** **Ground-state fidelity of the spin-1 Heisenberg chain with single ion anisotropy: quantum renormalization group and exact diagonalization approaches**
A Langari, F Pollmann and M Siahatgar
- 406003** **Ground states of the Ising model on an anisotropic triangular lattice: stripes and zigzags**
Yu I Dublenych
