## Condensed Matter

Volume 25 Number 45 13 November 2013

### Special issue

#### Reverse Monte Carlo modelling

Guest Editors: *David A Keen and László Pusztai*

### SPECIAL ISSUE ON REVERSE MONTE CARLO MODELLING

#### PREFACE

- 450301 **The First 24 Years of Reverse Monte Carlo Modelling, Budapest, Hungary, 20–22 September 2012**  
David A Keen and László Pusztai

#### SPECIAL ISSUE PAPERS

- 454201 **Conformational analysis of bis(methylthio)methane and diethyl sulfide molecules in the liquid phase: reverse Monte Carlo studies using classical interatomic potential functions**  
Orsolya Gereben and László Pusztai
- 454202 **Towards a robust ad hoc data correction approach that yields reliable atomic pair distribution functions from powder diffraction data**  
Simon J L Billinge and Christopher L Farrow
- 454203 **The atomic scale structure of CXV carbon: wide-angle x-ray scattering and modeling studies**  
L Hawelek, A Brodka, J C Dore, V Honkimaki and A Burian
- 454204 **Local structure correlations in plastic cyclohexane—a reverse Monte Carlo study**  
Nicholas P Funnell, Martin T Dove, Andrew L Goodwin, Simon Parsons and Matthew G Tucker
- 454205 **Neutron powder diffraction and molecular dynamics study of superionic SrBr<sub>2</sub>**  
S Hull, S T Norberg, S G Eriksson and C E Mohn
- 454206 **Atomic order and cluster energetics of a 17 wt% Si-based glass versus the liquid phase**  
G S E Antipas, L Temleitner, K Karalis, L Pusztai and A Xenidis
- 454207 **Total scattering analysis of cation coordination and vacancy pair distribution in Yb substituted  $\delta$ -Bi<sub>2</sub>O<sub>3</sub>**  
M Leszczynska, X Liu, W Wrobel, M Malys, S T Norberg, S Hull, F Krok and I Abrahams
- 454208 **Modification of the sampling algorithm for reverse Monte Carlo modeling with an insufficient data set**  
Satoshi Sato and Kenji Maruyama
- 454209 **The origin of diffuse scattering in crystalline carbon tetraiodide**  
L Temleitner and L Pusztai
- 454210 **Silver environment and covalent network rearrangement in GeS<sub>3</sub>-Ag glasses**  
L Rátkai, I Kaban, T Wágner, J Kolář, S Valková, Iva Voleská, B Beuneu and P Jóvári
- 454211 **Reverse Monte Carlo study of spherical sample under non-periodic boundary conditions: the structure of Ru nanoparticles based on x-ray diffraction data**  
Orsolya Gereben and Valeri Petkov
- 454212 **Total neutron scattering investigation of the structure of a cobalt gallium oxide spinel prepared by solvothermal oxidation of gallium metal**  
Helen Y Playford, Alex C Hannon, Matthew G Tucker, Martin R Lees and Richard I Walton
- 454213 **The structure of water in solutions containing di- and trivalent cations by empirical potential structure refinement**  
Daniel T Bowron and Sofia Díaz Moreno
- 454214 **The proton conducting electrolyte BaTi<sub>0.5</sub>In<sub>0.5</sub>O<sub>2.75</sub>: determination of the deuteron site and its local environment**  
Stefan T Norberg, Seikh M H Rahman, Stephen Hull, Christopher S Knee and Sten G Eriksson
- 454215 **Acidic properties of aqueous phosphoric acid solutions: a microscopic view**  
I Harsányi, L Pusztai, P Jóvári and B Beuneu

*(Continued on inside back cover)*

- 454216 **Comparison of the atomic level structure of the plastic crystalline and liquid phases of CBr<sub>2</sub>Cl<sub>2</sub>: neutron diffraction and reverse Monte Carlo modelling**  
Szilvia Pothoczki, László Temleitner, Luis Carlos Pardo, Gabriel Julio Cuello, Muriel Rovira-Esteva and Josep Lluís Tamarit
- 454217 **Insights into the determination of molecular structure from diffraction data using a Bayesian algorithm**  
A Henao, M Rovira-Esteva, A Vispa, J Ll Tamarit, E Guardia and L C Pardo
- 454218 **Nanostructure determination from the pair distribution function: a parametric study of the INVERT approach**  
Matthew J Cliffe and Andrew L Goodwin
- 454219 **Empirical potential structure refinement of semi-crystalline polymer systems: polytetrafluoroethylene and polychlorotrifluoroethylene**  
A K Soper, K Page and A Llobet
- 454220 **spinvert: a program for refinement of paramagnetic diffuse scattering data**  
Joseph A M Paddison, J Ross Stewart and Andrew L Goodwin
- 454221 **Inter-molecular correlations in liquid Se<sub>2</sub>Br<sub>2</sub>**  
Hironori Shimakura, Yukinobu Kawakita, Koji Ohara, László Pusztai, Yuiko Wakisaka and Shin'ichi Takeda
- 454222 **RMCgui: a new interface for the workflow associated with running Reverse Monte Carlo simulations**  
Martin T Dove and Gary Rigg
