SURFACE, INTERFACE AND ATOMIC-SCALE SCIENCE PAPERS

- 315001 Structural analysis of FeO(1 1 1)/Ag(0 0 1): undulation of hexagonal oxide monolayers due to square lattice metal substrates**
D Bruns, I Kiesel, S Jentsch, S Lindemann, C Otte, T Schemme, T Kuschel and J Wollschläger
- 315002 Complete wetting near an edge of a rectangular-shaped substrate**
Alexandr Malijevský
- 315003 Structure of Bergman-type W-TiZrNi approximants to quasicrystal, analyzed by lattice inversion method**
H Huang, D Q Meng, X C Lai, T W Liu, Y Long and Q M Hu
- 315004 Nb-doped CaO: an efficient electron donor system**
Stefano Prada, Livia Giordano and Gianfranco Pacchioni
- 315005 Friction through reversible jumps of surface atoms**
O Y Fajardo, Itay Barel and Michael Urbakh
- 315006 Growth, reaction and nanowire formation of Fe on the ZnS(1 0 0) surface**
Ka Lun Man, Anastassia Pavlovska, Ernst Bauer, Andrea Locatelli, Tevfik O Menteş, Miguel A Niño, George K L Wong, Iam Keong Sou and Michael S Altman
- 315007 A charge optimized many-body (comb) potential for titanium and titania**
Yu-Ting Cheng, Tzu-Ray Shan, Tao Liang, Rakesh K Behera, Simon R Phillpot and Susan B Sinnott
- 315008 Prediction of novel interface-driven spintronic effects**
Satadeep Bhattacharjee, Surendra Singh, D Wang, M Viret and L Bellaiche
- 315009 Edge states of a three-dimensional topological insulator**
Oindrila Deb, Abhiram Soori and Diptiman Sen
- 315010 Electric field for tuning quantum entanglement in supported clusters**
Oleg O Brovko, Oleg V Farberovich and Valeri S Stepanyuk
- 315011 Shot noise in a quantum dot system coupled with Majorana bound states**
Qiao Chen, Ke-Qiu Chen and Hong-Kang Zhao
- 315012 Hydrogen retention and diffusion in tungsten beryllide**
A Allouche, N Fernandez and Y Ferro
- 315013 Dynamical coupling of plasmons and molecular excitations by hybrid quantum/classical calculations: time-domain approach**
Arto Sakko, Tuomas P Rossi and Risto M Nieminen
- 315014 Substrate engineering in stabilizing epitaxial MgO(1 1 1) polar ultrathin films: first-principles calculations**
Feifei Li, Yexin Feng, Zhenpeng Hu, Jing-Jun Xu and Lixin Zhang
