Condensed Matter

Volume 25 Number 16 24 April 2013

Topical Review

Anisotropy of spin relaxation and transverse transport in metals

Yuriy Mokrousov, Hongbin Zhang, Frank Freimuth, Bernd Zimmermann, Nguyen H Long, Jürgen Weischenberg, Ivo Souza, Phivos Mavropoulos and Stefan Blügel

FAST TRACK COMMUNICATIONS

- 162201 Anomalous bulk compression behaviour in a hyperstoichiometric uranium-dioxide–thorium-dioxide solid solution**
O Tschauner, C Ma, O Grubor-Urosevic and Y J Chen
- 162202 Control of the surface electronic structure of SrTiO₃(001) by modulation of the density of oxygen vacancies**
Kotaro Takeyasu, Keisuke Fukada, Masuaki Matsumoto and Katsuyuki Fukutani
- 162203 Pulsed ion beam measurement of defect diffusion lengths in irradiated solids**
S Charnvanichborikarn, M T Myers, L Shao and S O Kucheyev
- 162204 Anomalous superconducting state in LiFeAs implied by the ⁷⁵As Knight shift measurement**
S-H Baek, L Harnagea, S Wurmehl, B Büchner and H-J Grafe

TOPICAL REVIEW

- 163201 Anisotropy of spin relaxation and transverse transport in metals**
Yuriy Mokrousov, Hongbin Zhang, Frank Freimuth, Bernd Zimmermann, Nguyen H Long, Jürgen Weischenberg, Ivo Souza, Phivos Mavropoulos and Stefan Blügel

PAPERS

NANOSTRUCTURES AND NANOELECTRONICS

- 165301 Supersymmetry in spherical molecules and fullerenes under perpendicular magnetic fields**
V Jakubský, Ş Kuru, J Negro and S Tristao

ELECTRONIC STRUCTURE

- 165501 The band structure of WO₃ and non-rigid-band behaviour in Na_{0.67}WO₃ derived from soft x-ray spectroscopy and density functional theory**
B Chen, J Laverock, L F J Piper, A R H Preston, S W Cho, A DeMasi, K E Smith, D O Scanlon, G W Watson, R G Egdell, P-A Glans and J-H Guo
- 165502 Accurate screened exchange band structures for the transition metal monoxides MnO, FeO, CoO and NiO**
Roland Gillen and John Robertson
- 165503 Analysis of vacuum ultraviolet electronic spectra of Ce³⁺ and Pr³⁺ ions in Ca₉Lu(PO₄)₇: crystal-field calculations and simulation of optical spectra**
C-G Ma, M Trevisani, F Piccinelli, K V Ivanovskikh, M Bettinelli and M G Brik
- 165504 Epitaxial strain induced magnetic transitions and phonon instabilities in tetragonal SrRuO₃**
He He, Hang-Chen Ding, Yong-Chao Gao, Shi-Jing Gong, Xiangang Wan and Chun-Gang Duan
- 165505 Variation of Zr-L_{2,3} XANES in tetravalent zirconium oxides**
Hidekazu Ikeno, Michael Krause, Thomas Höche, Christian Patzig, Yongfeng Hu, Antje Gawronski, Isao Tanaka and Christian Rüssel

SUPERCONDUCTORS AND METALS

- 165701 Anelasticity-induced increase of the Al-centered local symmetry in the metallic glass La₅₀Ni₁₅Al₃₅**
M T Sandor, H B Ke, W H Wang and Y Wu
- 165702 Interlayer penetration depth in the pseudogap phase of cuprate superconductors**
J P Carbotte and E Schachinger

(Continued on inside back cover)

165703 Evolution of electron–boson spectral density in the underdoped region of $\text{Bi}_2\text{Sr}_{2-x}\text{La}_x\text{CuO}_6$
Jungseok Hwang and J P Carbotte

165704 Spin glass to superconducting phase transformation by oxidation of a molybdo-cuprate: $\text{Mo}_{0.3}\text{Cu}_{0.7}\text{Sr}_2\text{TmCu}_2\text{O}_y$
Sourav Marik, A J Dos santos-Garcia, Emilio Morán, O Toulemonde and M A Alario-Franco

SEMICONDUCTORS

165801 A study of hydrogen microstructure in amorphous silicon via inversion of nuclear magnetic resonance spectra
Rajendra Timilsina and Parthapratim Biswas

165802 Thermally activated cation ordering in ZnGa_2Se_4 single crystals studied by Raman scattering, optical absorption, and *ab initio* calculations
R Vilaplana, O Gomis, E Pérez-González, H M Ortiz, F J Manjón, P Rodríguez-Hernández, A Muñoz, P Alonso-Gutiérrez, M L Sanjuán, V V Ursaki and I M Tiginyanu

DIELECTRICS AND FERROELECTRICS

165901 A first-principles study on the intrinsic asymmetric ferroelectricity of the SrTiO_3 – BaTiO_3 – CaTiO_3 tricolor superlattice at the nanoscale
Yong-Chao Gao, Chun-Gang Duan, X D Tang, Z G Hu, Pingxiong Yang, Ziqiang Zhu and Junhao Chu

MAGNETISM AND MAGNETIC MATERIALS

166001 Indirect RKKY interaction between localized magnetic moments in armchair graphene nanoribbons
Karol Szałowski
