

Magnetohydrodynamics 51, 3 (2015)

Special issue: Selected papers of the 9th PAMIR International Conference ``Thermo Acoustic and Space Technologies'', Riga, Latvia, June 16--20, 2014.

A. Alemany and J. Freibergs. PREFACE	417
I. Grants, D. Rübiger, T. Vogt, S. Eckert and G. Gerbeth. Application of magnetically driven tornado-like vortex for stirring floating particles into liquid metal	419
V. Dubodelov, M. Slazhnev, Y. Moiseev, K. Bogdan, M. Goryuk and A. Podoltsev. Influence of MHD processes on operating characteristics in working areas of magnetodynamic installations for aluminium alloys	425
A. Bojarevičs, T. Beinerts, I. Grants, I. Kaldre, A. Šivars, G. Gerbeth and Yu. Gelfgat. Effect of superimposed DC magnetic field on an AC induction semi-levitated molten copper droplet	437
I. Kaldre, Y. Fautrelle, J. Etay, A. Bojarevičs and L. Buligins. Segregation control at directional solidification using magnetic field and electric current	445
V. Bojarevics, K. Pericleous, M. Garrido, Y. Fautrelle and L. Davoust. Travelling magnetic field mixing for particle dispersion in liquid metal	453
M. Ratajczak, T. Wondrak, F. Stefani and S. Eckert. Numerical and experimental investigation of the contactless inductive flow tomography in the presence of strong static magnetic fields	461
A. Kapusta, B. Mikhailovich, S. Khripchenko and I. Kolesnichenko. On the prediction of the structure of ingots solidifying in RMF	473
C. Latge, P. Le Coz, O. Gastaldi, F. Gauche and N. Devictor. The ASTRID Project and related R&D on Na technology	485
A. Onea, N. Diez de los Rios Ramos, W. Hering, J. L. Palacios and R. Stieglitz. AMTEC clusters for power generation in a concentrated solar power plant	495
S. Smolentsev and M. Abdou. Dual-Coolant Lead-Lithium (DCLL) blanket: status and R&D in the area of MHD thermofluids and fluid materials interaction	509
S. M. H. Mirhoseini and A. Alemany. Analytical study of thermoacoustic MHD generator	519
A. Alemany, S. Carcangiu, R. Forcinetti, A. Montisci and J. P. Roux. Feasibility analysis of an MHD inductive generator coupled with a thermoacoustic resonator	531
J. H. Goh, Y. A. Abakr and D. B. Hann. Influence of feedback loop characteristics on the performance of a travelling wave thermoacoustic engine	543
A. F. Pshenichnikov and A. A. Kuznetsov. Sedimentation of particles in concentrated magnetic fluids: numerical simulation	551
D. Zablotsky and E. Blums. Pore-scale simulation of magnetosolutal microconvection in ferrofluid saturated porous structures]	561
S. Spitans, E. Baake, A. Jakovičs and H. Franz. Numerical simulation of electromagnetic levitation in a cold crucible furnace]	567
O. Kazak, Ch. Heinicke, Th. Wondrak and Th. Boeck. Electromagnetic interaction of a small magnet and liquid metal flow in a pipe with insulating or conducting walls]	579
A. Sellier. Motion of an insulating solid particle near a plane boundary under the	589

action of uniform ambient electric and magnetic fields]	
L. Ma, C. Weisman, D. Baltean-Carlès, I. Delbende and L. Bauwens. Numerical simulation of flow dynamics in the periodic regime in an idealized thermoacoustic engine]	601
S. Bühler, D. Wilcox, J. P. Oosterhuis and T. H. van der Meer. Mean temperature profile at the entrance of a thermoacoustic stacked screen heat exchanger	609
D. W. Y. Khoo and Y. A. Abakr. Experimental and numerical investigation of the acoustic absorption coefficient at very low frequency]	617
J.-F. Geneste. A new architecture for electricity generation onboard telecommunications satellites]	629
