

Magnetohydrodynamics 53, 3 (2017)

GENERAL AND THEORETICAL PROBLEMS

- Ching-Yao Chen, He-Ching Lin, Che-Jui Teng and Yan-Hom Li. Dynamics of a superparamagnetic microparticle chain in an oscillating magnetic field: effects of field frequency 449
- B. E. Kashevsky, Y. I. Dikansky, S. A. Kunikin and D. V. Gladkikh. Axial dynamic susceptibility of rotating magnetic fluid in a transverse bias field 461
- V. M. Polunin, S. G. Yemelyanov, P. A. Ryapolov and E. V. Shel'deshova. Shear and oscillations of the magnetic fluid column in a strong magnetic field 471
- A. V. Kotlyar, T. E. Krasnoschekova, L. A. Sukomel, I. A. Belyaev, E. V. Sviridov and V. G. Sviridov. Turbulent MHD heat transfer in liquids with the Prandtl number $Pr > 1$ 483
- N. V. Kandaurova, V. V. Chekanov and V. S. Chekanov. Experimental study of the properties of autowave sources (reverberators) in the magnetic fluid near-electrode layer using reflected light interference 495

APPLIED PROBLEMS

- V. Abbasi, K. Niayesh and A. Gholami. Verification of a numerical MHD arc model for high voltage circuit breakers using experimental images 501
- V. Dolgikh, S. Denisov and A. Pavlinov. Experimental investigation of an MHD-pump model with inclined partitions 511
- V. Dolgikh. Experimental study of the MHD pump assembled with liquid metal electrodes and magnetic system 515
- V. Timofeev, M. Khatsayuk and S. Timofeev. Analysis of the transverse end effect in the MHD stirrer for molten metals 521
- I. L. Nikulin. Analysis of possibilities of melt surface cleaning by controlling AMF frequency and distribution 537
- L. Marioni, E. Hachem and F. Bay. Numerical coupling strategy for the simulation of electromagnetic stirring 547
- S. Spitzans, H. Franz, H. Scholz, G. Reiter and E. Baake. Numerical simulation of the ingot growth during the vacuum arc remelting process 557
- M. Barna. Investigation of linear electromagnetic stirring and its impact on the liquid steel flow in a continuous slab caster 571
- D. Musaeva, E. Baake, A. Köppen and P. Vontobel. Application of neutron radiography for in-situ visualization of gallium solidification in travelling magnetic field 583
