

Magnetohydrodynamics 54, 1/2 (2018)

Special issue:

Selected papers of the 6th All-Russian conference with international participation

"Physicochemical and Applied Problems of Magnetic Disperse Nanosystems"

Stavropol, Russia, September 2017

S. S. Belykh and C. V. Yerin. Magneto-optic effect in water-based magnetic emulsions	5
N. V. Kandaurova, V. V. Chekanov and V. S. Chekanov. Excitation autowave spreading modes in the near-electrode layer of magnetic fluid	11
D. V. Gladkikh, Yu. I. Dikansky and A. G. Ispiryan. Some features of the magnetization of thin layers of magnetic fluids with magnetized aggregates in magnetic and electric fields	15
A. N. Golubiatnikov. Non-linear waves in a thin layer of magnetic fluid	23
A. O. Ivanov. The influence of the concentration on the initial dynamic susceptibility of weakly interacting dipolar fluids: an analysis using theory and computer simulations	27
A. S. Ivanov. Some aspects of the surface tension temperature dependence of drop-like aggregates in magnetic fluids	33
C. A. Khokhryakova (Bushueva), K. G. Kostarev, A. V. Lebedev and M. O. Denisova. The effect of an oscillating vertically oriented magnetic field on the ferrofluid layer located on a perfluorooctane substrate	39
A. Kolesnikova and A. Zakinyan. Rotating magnetic field induced structure formation in a magnetic fluid emulsion	45
V. M. Korovin and V. A. Kazhan. Influence of longitudinal magnetic field on the Kelvin--Helmholz instability for two layers of ferrofluid at relative horizontal motion	49
V. M. Kozhevnikov, Yu. A. Larionov and I. Yu. Chuenkova. Features of electrical properties in a structured thin magnetic fluid layer	55
M. T. Krauzina, A. A. Bozhko, P. V. Krauzin and S. A. Suslov. The influence of uniform external magnetic field on heat transfer in ferrofluids	61
Yu. I. Dikansky, A. G. Ispiryan, S. A. Kunikin and A. V. Rodionov. Temperature dependence of ferrofluid susceptibility. Influence of particle size distribution	65
A. A. Kuznetsov, A. V. Lebedev and A. F. Pshenichnikov. Nonlinear response of a concentrated ferrofluid to a low-frequency magnetic field	73
D. Kvasov and V. Naletova. The form of the magnetic fluid drop in a uniform harmonic electric field with the concentration of surface charge transportations	79
Yu. A. Larionov, V. M. Kozhevnikov, I. Yu. Chuenkova and A. A. Antonova. Particle aggregation in magnetic fluid layer in electric field	85
M. S. Demin and T. F. Morozova. Modelling of electrical capacitance dependences of magnetic nanofluid layer in an electric field	91
D. Pelevina, O. Sharova, A. Vinogradova, V. Turkov and V. Naletova. Formation of bridges between non-magnetic surfaces via the magnetic fluid surface deformation in non-uniform magnetic fields	97
E. S. Pyanzina, E. V. Novak, D. A. Rozhkov, A. V. Gudkova and P. A. Sánchez. Influence of the particle shape on the equilibrium morphologies of supracolloidal magnetic filaments	103
A. Radionov. Magnetic fluid sealing complexes for bearing assemblies of mine main ventilation fans	109
I. A. Shabanova, A. M. Storozhenko, A. O. Tantsyura and I. M. Aref'ev. Azimuthal dependence of the acoustomagnetic effect in magnetic fluids	115

A. Yanovskii, A. Simonovskii and I. Chuenkova. Measurement of the vapor bubble formation frequency in boiling magnetic fluid by a two-layer medium method	121
A. P. Sizov, D. S. Repin, V. S. Elovsy, V. A. Komelkov and A. V. Toporov. Application of magnetic nanoscale dispersed systems in electromechanical devices operated at separations of gas and liquid fire extinguishing agents	127
I. M. Subbotin. Magnetic permeability of inverse ferrofluid emulsion: an influence of interdroplet interaction	131
V. M. Makarov, S. Z. Kalaeva, M. A. Kruchina, N. L. Markelova, I. N. Zakharova, A. A. Ezhov and A. M. Shipilin. Production of magnetite-containing composite based on iron hydroxide from underground waters to synthesize magnetic fluids	137
V. M. Makarov, S. Z. Kalaeva, N. L. Markelova, L. A. Tyukina and A. Yu. Dubov. Production of nanodisperse magnetite for polymer compositions to be used for various purposes	141
S. D. Turkin and Yu. I. Dikansky. Nanoparticles concentration influence on magnetic gyrotropy in ferrocolloids	147
A. Tyatyushkin. Drop of viscous magnetic fluid in a non-stationary magnetic field	153
C. V. Yerin, V. I. Lykhmanova and M. V. Yerina. Spectral dependences of the complex refractive index of concentrated magnetic fluids	157
A. Zakinyan. Electrical conductivity of inverse magnetic fluid emulsion	163
A. V. Zhukov. Stability of capillary--gravity waves in the presence of magnetic surfactant in an external magnetic field	167
