

Magnetohydrodynamics 55, 3 (2019)

GENERAL AND THEORETICAL PROBLEMS

- V. G. Bashtovoi, A. G. Reks, P. A. Riapolov, A. A. Motsar and V. S. Moroz. On shapes and stability of the magnetic fluid surface in uniform magnetic field 271
- Yu. I. Dikansky, A. G. Ispiryan and S. A. Kunikin. On the homogeneous dipole gas analogy in analysis of magnetic colloid magnetization 279
- A. N. Golubyatnikov. Non-linear ring waves in a thin layer of magnetic fluid with variable thickness 287
- T. M. Mishonov, Y. G. Maneva, M. V. Stoev and A. M. Varonov. Heating of the solar corona by Alfvén waves: magnetohydrodynamic calculation of the height temperature profile of the transition region 295
- Th. Arlt and L. Bühler. Numerical simulations of time-dependent Hunt flows with finite wall conductivity 319

APPLIED PROBLEMS

- V. N. Timofeev, M. Yu. Khatsayuk and I. V. Kizhaev. Mathematical simulation of electromagnetic and hydrodynamic processes in the MHD pump 337
- A. A. Demin, D. I. Merkulov, D. A. Pelevina, S. A. Kalmykov and V. A. Naletova. Determination of parameters of anisotropic magnetizable elastomer 347
- K. Surovovs, A. Kravtsov and J. Virbulis. Optimization of the shape of high-frequency inductor for the pedestal growth of silicon crystals 353
- Xu Yan, Liang Liang, Cheng Lizhi and Liu Yunlong. Influence law on the driving torque of a large gap magnetic driving system regarding the electromagnetic state switching offset angle 367
