JANUARY-FEBRUARY 2014 | VOLUME 17 | NUMBER 1

## Full charge

Solar cells and rechargeable lithium-air batteries

Designing polymers for highly efficient organic solar cells

Future perspectives for organic/inorganic perovskite solar cells

Prospects for rechargeable lithium-air batteries

**January-February 2014**

Volume 17 Number 1

pp. 1–46

### User rights

Articles published in this journal are made freely available on Elsevier's publishing platforms including ScienceDirect. Articles are protected by copyright and may be used for non-commercial purposes. Users may access, download, copy, display, redistribute, adapt, translate, text mine and data mine the articles provided that:

- They cite the article using an appropriate bibliographic citation (i.e. author(s), journal, article title, volume, issue, page numbers, DOI and the link to the definitive published version on ScienceDirect).
- They maintain the integrity of the article.
- They retain copyright notices and links to these terms and conditions so it is clear to other users what can and cannot be done with the article.
- They ensure that, for any content in the article that is identified as belonging to a third party, any re-use complies with the copyright policies of that third party.
- Any translations, for which a prior translation agreement with Elsevier has not been established, must prominently display the statement: "This is an unofficial translation of an article that appeared in an Elsevier publication. Elsevier has not endorsed this translation."

Use of published articles for commercial purposes is prohibited without permission. For permission to use published articles beyond the uses permitted here, visit [www.elsevier.com/permissions](http://www.elsevier.com/permissions).

Annual subscription price in the USA US\$325 (valid in North, Central and South America), including air speed delivery. Periodical postage paid at Rahway NJ and additional mailing offices.

## RESEARCH

### REVIEW

#### 11 How to design low bandgap polymers for highly efficient organic solar cells

*Tao Xu and Luping Yu*

### REVIEW

#### 16 Current progress and future perspectives for organic/inorganic perovskite solar cells

*Pablo P. Boix, Kazuteru Nonomura, Nripan Mathews and Subodh G. Mhaisalkar*

### REVIEW

#### 24 Rechargeable lithium-air batteries: characteristics and prospects

*Nobuyuki Imanishi and Osamu Yamamoto*

### REVIEW

#### 31 Graphene: a new emerging lubricant

*Diana Berman, Ali Erdemir and Anirudha V. Sumant*
