

Mathematical Programming SERIES B

A Publication of the Mathematical Optimization Society

Challenges and Opportunities for Optimization
in Electricity Systems

Edited by A.B. Philpott · M.C. Ferris · S.S. Oren

Mathematical Programming Series B

Volume 140 · Number 2 · September 2013

Special Issue: Challenges and Opportunities for Optimization in Electricity Systems

Guest Editors: A.B. Philpott · M.C. Ferris · S.S. Oren

PREFACE

Challenges and opportunities for optimization in electricity systems

A.B. Philpott · M.C. Ferris · S.S. Oren 235

FULL LENGTH PAPERS

A model and approach to the challenge posed by optimal power systems planning

R.P. O'Neill · E.A. Krall · K.W. Hedman · S.S. Oren 239

Risk adjusted discounted cash flows in capacity expansion models

A. Ehrenmann · Y. Smeers 267

Open versus closed loop capacity equilibria in electricity markets under perfect and oligopolistic competition

S. Wogrin · B.F. Hobbs · D. Ralph · E. Centeno · J. Barquín 295

On the existence of supply function equilibria

E.J. Anderson 323

Tacit collusion games in pool-based electricity markets under transmission constraints

A.L. Liu · B.F. Hobbs 351

Liquidity risks on power exchanges: a generalized Nash equilibrium model

G. de Maere d'Aertrycke · Y. Smeers 381

Instructions for Authors can be found on the journal's website www.springer.com/10107

Comprehensively covered by
ACM Computing Reviews,
Mathematical Reviews and
Zentrblatt MATH

Springer
