NANOTECHNOLOGY

VOLUME 25 NUMBER 31 8 AUGUST 2014

iopscience.org/nano

Featured article

Self-controlled fabrication of single-crystalline
silicon nanobeams using conventional micromachining
E Mehdizadeh, A Rahafrooz and S Pourkamali

IOP Publishing

NANOTECHNOLOGY

Volume 25

Number 31

8 August 2014

TOPICAL REVIEW

- 312001 **Reassembly of S-layer proteins**
Dietmar Pum and Uwe B Sleytr

PAPERS

Biology and medicine

- 315101 **Nanostructured molybdenum oxide-based antibacterial paint: effective growth inhibition of various pathogenic bacteria**
Karthikeyan Krishnamoorthy, Mariappan Premanathan, Murugan Veerapandian and Sang Jae Kim

Electronics and photonics

- 315201 **Plasmonic-photonic crystal coupled nanolaser**
Taiping Zhang, Ségolène Callard, Cécile Jamois, Céline Chevalier, Di Feng and Ali Belarouci

Patterning and nanofabrication

- 315301 **Harnessing entropic and enthalpic contributions to create a negative tone chemically amplified molecular resist for high-resolution lithography**
Prashant K Kulshreshtha, Ken Maruyama, Sara Kiani, James Blackwell, Deirdre L Olynick and Paul D Ashby
- 315302 **Generation of 3D nanopatterns with smooth surfaces**
Simon Waid, Heinz D Wanzenboeck, Michael Muehlberger, Marco Gavagnin and Emmerich Bertagnolli
- 315303 **Self-controlled fabrication of single-crystalline silicon nanobeams using conventional micromachining**
Emad Mehdizadeh, Amir Rahafrooz and Siavash Pourkamali

Energy at the nanoscale

- 315401 **Charging dynamics of supercapacitors with narrow cylindrical nanopores**
Alpha A Lee, Svyatoslav Kondrat, Gleb Oshanin and Alexei A Kornyshev
- 315402 **Ubiquitous element approach to plasmonic enhanced photocatalytic water splitting: the case of Ti@TiO₂ core-shell nanostructure**
Yuriy Pihosh, Ivan Turkevych, Kazuma Mawatari, Nobuko Fukuda, Ryoichi Ohta, Masahiro Tosa, Kiyoshi Shimamura, Encarnacion G Villora and Takehiko Kitamori

Materials: properties, characterization or tools

- 315701 **Size-dependent elastic moduli and vibrational properties of fivefold twinned copper nanowires**
Y G Zheng, Y T Zhao, H F Ye and H W Zhang
- 315702 **Economical and green synthesis of bagasse-derived fluorescent carbon dots for biomedical applications**
Fengyi Du, Miaomiao Zhang, Xiaofeng Li, Jianan Li, Xinyi Jiang, Zhang Li, Ye Hua, Genbao Shao, Jie Jin, Qixiang Shao, Ming Zhou and Aihua Gong
