Featured article

Chirality of the 1,4-phenylene-silica nanoribbons
at the nano and angstrom levels

Y Li, S Wang, M Xiao, M Wang, Z Huang,
B Li and Y Yang

PAPERS

Biology and medicine

- 035101 **A simple method of labeling amyloid β with quantum dots and ingestion of the labeled amyloid β by astrocytes**
Jing Zhang, Xing Jia, Hong Qing and Hai-Yan Xie
- 035102 **A supermolecular curcumin for enhanced antiproliferative and proapoptotic activities: molecular characteristics, computer modeling and *in vivo* pharmacokinetics**
Qunyou Tan, Jianyong Wu, Yi Li, Hu Mei, Chunjing Zhao and Jingqing Zhang
- 035103 **Drug loading and release on tumor cells using silk fibroin–albumin nanoparticles as carriers**
B Subia and S C Kundu

Electronics and photonics

- 035201 **Interaction of metallic nanoparticles with dielectric substrates: effect of optical constants**
Tanya Hutter, Stephen R Elliott and Sumeet Mahajan
- 035202 ***In situ* monitoring of a flash light sintering process using silver nano-ink for producing flexible electronics**
Wan-Ho Chung, Hyun-Jun Hwang, Seung-Hyun Lee and Hak-Sung Kim
- 035203 **Realization of nanoscaled tubular conductors by means of GaAs/InAs core/shell nanowires**
C Blömers, T Rieger, P Zellekens, F Haas, M I Lepsa, H Hardtdegen, Ö Gül, N Demarina, D Grützmacher, H Lüth and Th Schäpers
- 035204 **Fabrication of coupled graphene–nanotube quantum devices**
S Engels, P Weber, B Terrés, J Dauber, C Meyer, C Volk, S Trelenkamp, U Wichmann and C Stampfer

Patterning and nanofabrication

- 035301 **Direct-write 3D nanolithography at cryogenic temperatures**
M Bresin, M Toth and K A Dunn
- 035302 **Optimal growth of Ge-rich dots on Si(001) substrates with hexagonal packed pit patterns**
Yourui Huangfu, Wenbo Zhan, Xia Hong, Xu Fang, Guqiao Ding and Hui Ye
- 035303 **Novel 3D Au nanohole arrays with outstanding optical properties**
Bin Ai, Ye Yu, Helmuth Möhwald and Gang Zhang
- 035304 **Relationship between planar GaAs nanowire growth direction and substrate orientation**
Ryan S Dowdy, Donald A Walko and Xiuling Li

Energy at the nanoscale

- 035401 **Co-adsorption of N_2 in the presence of CH_4 within carbon nanospaces: evidence from molecular simulations**
K Vasanth Kumar and Francisco Rodríguez-Reinoso

Sensing and actuating

- 035501 **Effects of buffer composition and dilution on nanowire field-effect biosensors**
Noémie Lloret, Rune S Frederiksen, Thor C Møller, Nathalie I Rieben, Shivendra Upadhyay, Luca De Vico, Jan H Jensen, Jesper Nygård and Karen L Martinez
- 035502 **Plasmonic-enhanced carbon nanotube infrared bolometers**
M Mahjouri-Samani, Y S Zhou, X N He, W Xiong, P Hilger and Y F Lu

Materials: synthesis or self-assembly

- 035601 **Preparation and characterization of 1-naphthylacetic acid–silica conjugated nanospheres for enhancement of controlled-release performance**
Mingming Ao, Yuncong Zhu, Shun He, Deguang Li, Pingliang Li, Jianqiang Li and Yongsong Cao
- 035602 **Self-assembly of oxide-supported metal clusters into ring-like structures**
Kristoffer Meinander, Kai Nordlund and Juhani Keinonen

- 035603 Chirality of the 1,4-phenylene–silica nanoribbons at the nano and angstrom levels**
Yi Li, Sibing Wang, Min Xiao, Mingliang Wang, Zhibin Huang, Baozong Li and Yonggang Yang
- Materials: properties, characterization or tools**
- 035701 Mechanical characterization of pristine and hydrogen-exposed palladium nanowires by *in situ* TEM**
Jennifer Carpena-Núñez, Dachi Yang, Jae-Woo Kim, Cheol Park and Luis F Fonseca
- 035702 Tuning resistive switching on single-pulse doped multilayer memristors**
Pablo F Siles, Muriel de Pauli, Carlos Cesar Bof Bufon, Sukarno O Ferreira, Jefferson Bettini, Oliver G Schmidt and Angelo Malachias
- 035703 Influence of substrate nitridation temperature on epitaxial alignment of GaN nanowires to Si(111) substrate**
A Wierzbicka, Z R Zytkeiwicz, S Kret, J Borysiuk, P Dluzewski, M Sobanska, K Klosek, A Reszka, G Tchutchulashvili, A Cabaj and E Lusakowska
- 035704 Excitonic properties of wurtzite InP nanowires grown on silicon substrate**
M H Hadj Alouane, N Chauvin, H Khmissi, K Naji, B Ilahi, H Maaref, G Patriarche, M Gendry and C Bru-Chevallier
- 035705 Retardation assisted enhanced Raman scattering from silicon nanostripes in the visible range**
G Ndong, G Picardi, M Chaigneau and R Ossikovski
- 035706 Graphene to fluorographene and fluorographane: a theoretical study**
R Paupitz, P A S Autreto, S B Legoas, S Goverapet Srinivasan, A C T van Duin and D S Galvão
- 035707 Electrical response from nanocomposite PDMS–Ag NPs generated by *in situ* laser ablation in solution**
Maria Kalyva, Susmit Kumar, Rosaria Brescia, Simona Petroni, Carola La Tegola, Giovanni Bertoni, Massimo De Vittorio, Roberto Cingolani and Athanassia Athanassiou
- 035708 Non-hexagonal-ring defects and structures induced by healing and strain in graphene and functionalized graphene**
Joice da Silva-Araújo, A J M Nascimento, Hélio Chacham and R W Nunes
