CONTENTS

1 May 2014 / Vol 509 / Issue No 7498

THIS WEEK

EDITORIALS

- 7 EMISSIONS**
No magic fix for carbon
Why carbon capture and storage is not the fairy godmother of climate solutions
- 7 CLINICAL TRIALS**
False positives
Publishers must help clinicians to avoid discrepancies in trial reporting
- 8 MISCONDUCT**
Agency for change
Japan should waste no time in creating an office for research integrity

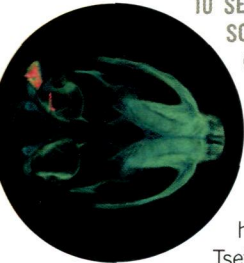

WORLD VIEW

- 9 The moral problem with commercial seal hunting**
Andy Butterworth
Trade sanctions are an important part of the fight to stop Canada's barbaric seal hunts

RESEARCH HIGHLIGHTS

10 SELECTIONS FROM THE SCIENTIFIC LITERATURE

California warming / Shape-shifter vine / Genes by ear / Chernobyl-adapted birds / Must-read paper bemoans hypercompetitiveness / Tsetse-fly genome

SEVEN DAYS

- 12 THE NEWS IN BRIEF**
South Sudan faces famine / Head of stem-cell probe resigns / Hepatitis C drug sets sales record

CAREERS

- 123 PUBLIC RELATIONS**
For your information
Communicating results to a broad public has become a vital part of the scientific process
- 125 COLUMN**
Choosing to stay
Yoshimi Rii
The logical next step for some graduate students could be to stay just where you are

NEWS IN FOCUS

- 15 THERAPEUTICS**
Analysis raises questions over efficacy of stem-cell therapies for heart disease

- 20 ENERGY**
Canada and Mississippi on track to capture carbon emissions from coal

16 SECURITY
Ambitious US vaccine-production facilities draw doubters

18 RESEARCH AND DEVELOPMENT
Technology firms move to fill gaps in funding for basic science

FEATURES

INFECTIOUS DISEASE

Smallpox watch

Virologists hunt for ancient specimens of the poxvirus **PAGE 22**

COMMENT

AGRICULTURAL INNOVATION

Farmers are the future

The next wave of crop improvements should come from small-scale research projects, say Tom MacMillan and Tim G Benton **PAGE 25**

- 27 EMBRYO RESEARCH**
Regulate embryos made for research
Insoo Hyun
US policy on human embryo research must keep pace with developments in the field

BOOKS & ARTS

- 30 SCIENCE BIOGRAPHY**
A voyage round Newton
Mordechai Feingold
- 31 BOOKS IN BRIEF**
- 32 SPACE POLICY**
A clearer final frontier
David Southwood

CORRESPONDENCE

- 33** The role of retractions / Make data cheaper / Stay with us, Scotland / Europe's green belt / Walt Whitman and cortical folding

FUTURES

128 An uncanny life
Ryan Rubai

CONTENTS

1 May 2014 / Vol 509 / Issue No 7498

RESEARCH

NEW ONLINE

35 Papers published this week at nature.com

NEWS & VIEWS

36 ECOLOGY

Drought in the Congo Basin

Remote sensing reveals effects of chronic drought in tropical forests
Jeffrey Q Chambers & Dar A Roberts

SEE LETTER P.86

37 APPLIED PHYSICS

Bright electron twisters

Converting ordinary electron beams into helical beams
Jun Yuan

38 NEUROSCIENCE

Feedback throttled down for smooth moves

GABAergic interneurons regulate voluntary muscle movements
Stephen H Scott & Frédéric Crevecoeur

SEE ARTICLE P.43

40 GEOPHYSICS

Making the Earth move

Electrical conductivity of melts formed at the onset of mantle melting
Rob L Evans SEE LETTER P.81

41 ASTRONOMY

A new spin on exoplanets

Direct measurement of the spin of an exoplanet

Travis Barman SEE LETTER P.63

ARTICLES

43 NEUROSCIENCE Presynaptic inhibition of spinal sensory feedback ensures smooth movement

A J P Fink et al. SEE N&V P.38

49 STEM CELLS Haematopoietic stem cells require a highly regulated protein synthesis rate

R A J Signer, J A Magee, A Salic & S J Morrison

55 IMMUNOLOGY Developmental pathway for potent V1V2-directed HIV-neutralizing antibodies

N A Doria-Rose et al.

LETTERS

63 ASTRONOMY Fast spin of the young extrasolar planet β Pictoris b

I A G Snellen et al. SEE N&V P.41

ON THE COVER

On the move

The motions strikingly represented in *Heel Daoyin*, a kinetic sculpture by Peter Jansen, resemble limb oscillations seen in the absence of presynaptic inhibition. A new study identifies presynaptic inhibition in the spinal cord as part of a hard-wired gain control system crucial for the smooth execution of movement.

PAGES 38 & 43

66 OPTICS AND PHOTONICS Molecular photons interfaced with alkali atoms

P Siyushev, G Stein, J Wrachtrup & I Gerhardt

71 ORGANIC CHEMISTRY Spontaneous transfer of chirality in an atropisomerically enriched two-axis system

K T Barrett, A J Metrano, P R Rablen & S J Miller

76 CLIMATE SCIENCE North Atlantic forcing of tropical Indian Ocean climate

M Mohtadi et al.

81 GEOPHYSICS Electrical conductivity during incipient melting in the oceanic low-velocity zone

D Sifré et al. SEE N&V P.40

86 ECOLOGY Widespread decline of Congo rainforest greenness in the past decade

L Zhou et al. SEE N&V P.36

91 CANCER Identification of genomic alterations in oesophageal squamous cell cancer

Y Song et al.

96 NEUROSCIENCE Cystathionine γ -lyase deficiency mediates neurodegeneration in Huntington's disease

B D Paul et al.

101 STEM CELLS Nuclear reprogramming by interphase cytoplasm of two-cell mouse embryos

E Kang et al.

105 CELL BIOLOGY Quantitative proteomics identifies NCOA4 as the cargo receptor mediating ferritinophagy

J D Mancias, X Wang, S P Gygi, J W Harper & A C Kimmelman

110 STRUCTURAL BIOLOGY Structural basis for ubiquitin-mediated antiviral signal activation by RIG-I

A Peisley, B Wu, H Xu, Z J Chen & S Hur

115 STRUCTURAL BIOLOGY Structure of the human P2Y₁₂ receptor in complex with an antithrombotic drug

K Zhang et al.

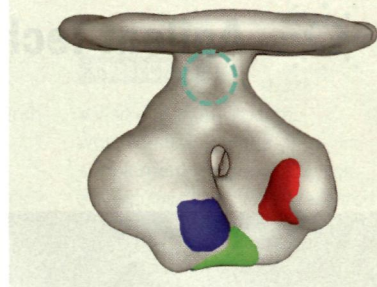

119 STRUCTURAL BIOLOGY Agonist-bound structure of the human P2Y₁₂ receptor

J Zhang et al.

IMMUNOLOGY

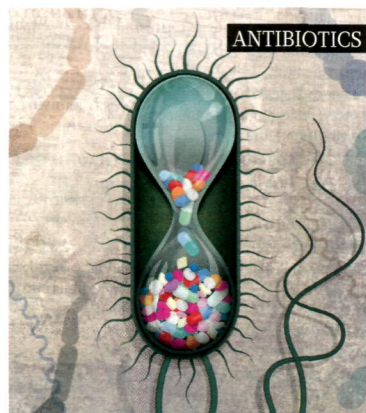

AIDS vaccine

A study of anti-HIV antibody evolution in an individual patient provides important insights relevant to vaccine development. PAGE 55

ANTIBIOTICS

natureOUTLOOK

Produced with support from:
 Roche

The race against
resistance

Turn to page 34

S1 EDITORIAL

Antibiotics

Mike May

S2 ANTIBIOTIC RESISTANCE

An infectious arms race

The quest for drugs that work

S4 DRUG DEVELOPMENT

Time for teamwork

Government and industry join forces to combat bacteria

S6 MICROBIOLOGY

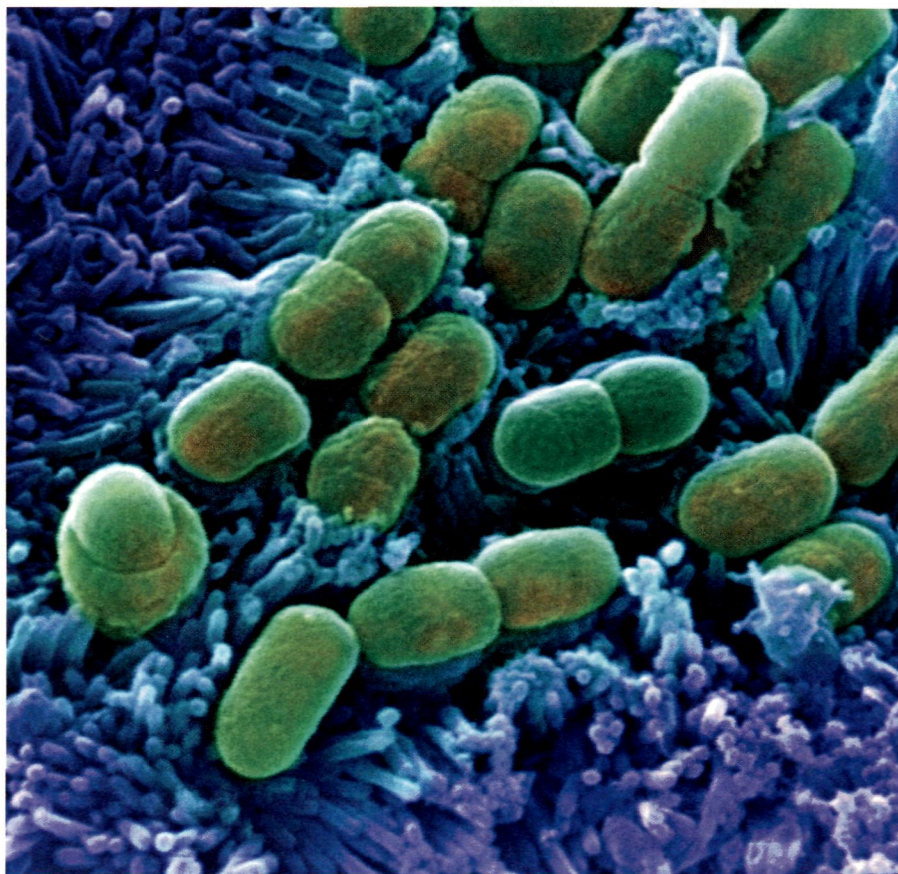

Resistance fighters

Weak spots in bacterial evolution

S9 PERSPECTIVE

The age of the phage

Shigenobu Matsuzaki and colleagues call for the return of bacteria-killing viruses

Academic researchers are using *Escherichia coli* in the hunt for novel antibiotic agents (see page S10).

S10 DRUG DISCOVERY

Leaving no stone unturned

The global search for new antibiotics

S13 PERSPECTIVE

Synthetic biology revives antibiotics

Re-engineering natural products will create new drugs, says Gerard Wright

S14 DIAGNOSTICS

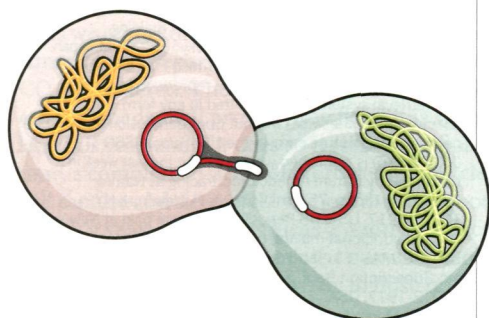

Detection drives defence

Faster diagnosis could decrease misuse of antibiotics

S16 PUBLIC HEALTH

The politics of antibiotics

Overuse in agriculture and medicine is creating a global tragedy
