THE INTERNATIONAL WEEKLY JOURNAL OF SCIENCE

RESISTANCE MOVEMENT

How gut bacteria top up
antibiotic resistance from a
phage-gene reservoir **PAGE 219**

CLIMATE MODELS

WEATHER WATCH

Outlook uncertain for
near-term forecasting

PAGE 139

ENERGY

ELECTRIC DREAMS

US needs smarter grids to
stop the blackouts

PAGE 145

REVIEWS

SUMMER BOOKS

Holiday reads from Nature's
regular reviewers

PAGE 150

NATURE.COM/NATURE

11 July 2013 £10

Vol. 499, No. 7457

CONTENTS

11 July 2013 / Vol 499 / Issue No 7457

THIS WEEK

EDITORIALS

125 MEDICAL RESEARCH

Trial and error

Italy's plans for a trial of an unproven stem-cell therapy must be shelved

125 FUNDING

In the dark

Germany's DFG needs to clarify its new rules on confidentiality

126 COMMUNICATION

Headline message

An evolving science media should not abandon investigative journalism

WORLD VIEW

127 **A slippery slope to human germline modification**

Marcy Darnovsky

The UK government's move to trial mitochondrial replacement is extremely rash

RESEARCH HIGHLIGHTS

128 SELECTIONS FROM THE SCIENTIFIC LITERATURE

Crows join the mob / Carbon-14 dates ivory / Seeds of modern agriculture / Heard about the bionic ear? / Broken quantum entanglement gets fixed

SEVEN DAYS

130 THE NEWS IN BRIEF

Pluto's moons get names / Peruvian pyramid is destroyed / Solar plane completes coast-to-coast flight / End of the line for Jason-1 satellite

CAREERS

243 NETWORKING

Real connections

You can't beat the personal touch when it comes to making career-building relationships

245 COLUMN

Music meets science

Stephane Detournay

Composers and scientists — two sides of the same coin?

NEWS IN FOCUS

133 ASTRONOMY

Large Binocular Telescope gets off to a slow start

134 PUBLISHING

Copyright deal gives visually impaired improved access to scientific texts

135 PHYSICS

Noise barrier suggests electron microscopy has reached its limit

136 BIOMEDICAL RESEARCH

Researchers question plans for a 'Japanese NIH'

137 FUNDING

Push for commercialization threatens to starve US research firms of funds

FEATURES

139 CLIMATE CHANGE

The forecast for 2018 is cloudy with record heat

The struggle to perfect accurate near-term forecasts

SCIENCE MEDIA

Centre of attention

Fiona Fox is on a mission to improve science reporting **PAGE 142**

COMMENT

145 ENERGY

The smart-grid solution

Massoud Amin

Expect power outages unless the US electricity grid becomes self-healing

147 FUNDING

What would you cut?

David Garman & Armond Cohen; Benjamin Jones; David Goldston

How to strengthen the US science base despite the budget sequester

BOOKS & ARTS

HOLIDAY READING

Summer books

Nature regulars share their vacation picks — and there's more online

PAGE 150

CORRESPONDENCE

154 Astronomical history / Shale-as-pollution / Counting badgers

FUTURES

248 **All that remains**

Shane D Rhinewald

CONTENTS

11 July 2013 / Vol 499 / Issue No 7457

RESEARCH

NEW ONLINE

155 Papers published this week at nature.com

NEWS & VIEWS

156 FORUM: MALARIA

Molecular secrets of a parasite

Regulation of *P. falciparum* var genes by histone modification
Swaminathan Venkatesh & Jerry L Workman; Mats Wahlgren & Maria Teresa Bejarano

SEE LETTER P.223

157 GEOPHYSICS

A third way to rift continents

Rifting of continents can be caused by local effects
W Roger Buck

159 OPTICAL PHYSICS

Trapping the light fantastic

A photonic-crystal system that acts as a perfect mirror
A Douglas Stone SEE LETTER P.188

160 EARTH SCIENCE

A holistic approach to climate targets

Allowable carbon emissions under multiple climate objectives
Joeri Rogelj SEE LETTER P.197

161 CELL BIOLOGY

Lipid switches and traffic control

Role of PI(3,4)P₂ in clathrin-mediated endocytosis
Sandra L Schmid & Marcel Mettlen

SEE LETTER P.233

STEM CELLS

Go digital

Digit regeneration begins with the nail stem cells PAGE 228

ON THE COVER

Phage values

Antibiotic treatment in mice enriches phage-encoded genes related to antibiotic resistance in the gut microbiota, and phage from antibiotic-treated mice enhance resistance in gut bacteria. These findings implicate the phageome in the emergence of multidrug resistance. PAGE 219

ANALYSIS

163 QUANTUM PHYSICS Oversimplifying quantum factoring

J A Smolin, G Smith & A Vargo

ARTICLES

166 CELL BIOLOGY Temporal regulation of EGF signalling networks by the scaffold protein Shc1

Y Zheng et al.

172 BIOCHEMISTRY A compendium of RNA-binding motifs for decoding gene regulation

D Ray et al.

178 DISEASE The *Mycobacterium tuberculosis* regulatory network and hypoxia

J E Galagan et al.

LETTERS

184 ASTRONOMY Formation of sharp eccentric rings in debris disks with gas but without planets

W Lyra & M Kuchner

188 OPTICAL PHYSICS Observation of trapped light within the radiation continuum

C W Hsu et al. SEE N&V P.159

192 CHEMISTRY Metal-free oxidation of aromatic carbon-hydrogen bonds through a reverse-rebound mechanism

C Yuan et al.

197 CLIMATE SCIENCE Allowable carbon emissions lowered by multiple climate targets

M Steinacher, F Joos & T F Stocker
SEE N&V P.160

202 EARTH SCIENCE Characterization and implications of intradecadal variations in length of day

R Holme & O de Viron

205 ECOLOGY Gene expression in the deep biosphere

W D Orsi, V P Edgcomb, G D Christman & J F Biddle

209 GENETICS Pan genome of the phytoplankton *Emiliania huxleyi* underpins its global distribution

B A Read et al.

214 CANCER Mutational heterogeneity in cancer and the search for new cancer-associated genes

M S Lawrence et al.

219 MICROBIOLOGY Antibiotic treatment expands the resistance reservoir and ecological network of the phage metagenome

S R Modi, H H Lee, C S Spina & J J Collins

223 MOLECULAR BIOLOGY PfSETvs methylation of histone H3K36 represses virulence genes in *Plasmodium falciparum*

L Jiang et al. SEE N&V P.156

228 STEM CELLS Wnt activation in nail epithelium couples nail growth to digit regeneration

M Takeo et al.

233 CELL BIOLOGY Spatiotemporal control of endocytosis by phosphatidylinositol-3,4-bisphosphate

Y Posor et al. SEE N&V P.161

238 IMMUNOLOGY An siRNA screen for NFAT activation identifies septins as coordinators of store-operated Ca²⁺ entry

S Sharma et al.
