Editor's choice and Forum

Global biogeography of autotroph chemistry: is insolation a driving force? 1121 Elizabeth T. Borer, Matthew E. S. Bracken, Eric W. Seabloom, Jennifer E. Smith, Just Cebrian, Elsa E. Cleland, James J. Elser, William F. Fagan, Daniel S. Gruner, W. Stanley Harpole, Helmut Hillebrand, Andrew J. Kerkhoff and Jacqueline T. Ngai

Editor's choice

Are functional traits and litter decomposability coordinated across leaves, twigs and wood? A test using temperate rainforest tree species 1131 Benjamin G. Jackson, Duane A. Peltzer and David A. Wardle

Forum

Another call for the end of invasion biology 1143 Loïc Valéry, Hervé Fritz and Jean-Claude Lefeuvre

Research

The interplay between above- and below-ground plant–plant interactions along an environmental gradient: insights from two-layer zone-of-influence models 1147 Wei-Ping Zhang, Xin Jia, Christian Damgaard, E. Charles Morris, Yan-Yuan Bai, Sha Pan and Gen-Xuan Wang

Environmental and plant genetic effects on tri-trophic interactions 1157 Luis Abdala-Roberts and Kailen A. Mooney

Demographic response of tundra small mammals to a snow fencing experiment 1167 Frédéric Bilodeau, Donald G. Reid, Gilles Gauthier, Charles J. Krebs, Dominique Berteaux and Alice J. Kenney

How to measure top–down vs bottom–up effects: a new population metric and its calibration on *Daphnia* 1177 Leonard V. Polishchuk, Jacobus Vijverberg, Dmitry A. Voronov and Wolf M. Mooij

Resource tracking in marine parasites: going with the flow? 1187 Ross M. Thompson, Robert Poulin, Kim N. Mouritsen and David W. Thieltges

Population synchrony and stability in environmentally forced metacommunities 1195 Christopher F. Steiner, Richard D. Stockwell, Vidhya Kalaimani and Zakaria Aqel

Interspecific differences in stochastic population dynamics explains variation in Taylor's temporal power law 1207 Marit Linnerud, Bernt-Erik Sæther, Vidar Grøtan, Steinar Engen, David G. Noble and Robert P. Freckleton

Social familiarity relaxes the constraints of limited attention and enhances reproduction of group-living predatory mites 1217 Markus A. Strodl and Peter Schausberger

Divergent host phenotypes create opportunities and constraints on the distribution of two wing-dwelling feather mites 1227 Sofía Fernández-González, Iván De la Hera, Antón Pérez-Rodríguez and Javier Pérez-Tris

Foraging efficiency and the fitness consequences of spatial marking by ladybeetle larvae 1238 Matthew H. Meisner and Anthony R. Ives

The more polluted the environment, the more important biodiversity is for food web stability 1247 Leslie Garay-Narváez, Matías Arim, José D. Flores and Rodrigo Ramos-Jiliberto

Picky hitch-hikers: vector choice leads to directed dispersal and fat-tailed kernels in a passively dispersing mite 1254 Emanuel A. Fronhofer, Ellen B. Sperr, Anna Kreis, Manfred Ayasse, Hans Joachim Poethke and Marco Tschapka
