SYNTHESISING ECOLOGY

122

OCTOBER 2013

Editor's choice

Linked exploitation and interference competition drives the variable behavior of a classic predator–prey system

Disentangling the role of connectivity, environmental filtering, and spatial structure on metacommunity dynamics

Research

Pollinators and seed predators generate conflicting selection on *Dalechampia* blossoms

Phenotypically similar but ecologically distinct: differences in competitive ability and predation risk among amphipods

Antelope mating strategies facilitate invasion of grasslands by a woody weed

No free lunch: displaced marsh consumers regulate a prey subsidy to an estuarine consumer

Bergmann's rule in mammals: a cross-species interspecific pattern

Parasites as prey in aquatic food webs: implications for predator infection and parasite transmission

Simple rules for complex landscapes: the case of hilltopping movements and topography

Pulses of marine subsidies amplify reproductive potential of lizards by increasing individual growth rate

Eavesdropping foragers use level of collective commotion as public information to target high quality patches

Costs, benefits, and loss of vertically transmitted symbionts affect host population dynamics
