OCTOBER 2014

Introduction – Editors Choice

Into darkness: unravelling the structure of soil food webs

1153 Ulrich Brose and Stefan Scheu

Soil food webs – complex topologies

Unravelling the complex structure of forest soil food webs: higher omnivory and more trophic levels

1157 Christoph Digel, Alva Curtsdotter, Jens Riede, Bernhard Klärner and Ulrich Brose

Trophic shift of soil animal species with forest type as indicated by stable isotope analysis

1173 Bernhard Klärner, Roswitha B. Ehnes, Georgia Erdmann, Bernhard Eitzinger, Melanie M. Pollierer, Mark Maraun and Stefan Scheu

Soil food webs – detecting missing links by molecular techniques

Shifts in trophic interactions with forest type in soil generalist predators as indicated by complementary analyses of fatty acids and stable isotopes

1182 Olga Ferlian and Stefan Scheu

Variations in prey consumption of centipede predators in forest soils as indicated by molecular gut content analysis

1192 Babett Günther, Björn C. Rall, Olga Ferlian, Stefan Scheu and Bernhard Eitzinger

Free-living nematodes as prey for higher trophic levels of forest soil food webs

1199 Kerstin Heidemann, Annika Hennies, Johanna Schakowske, Lars Blumenberg, Liliane Ruess, Stefan Scheu and Mark Maraun

Soil food webs – driving forces

Litter elemental stoichiometry and biomass densities of forest soil invertebrates

1212 David Ott, Christoph Digel, Bernhard Klärner, Mark Maraun, Melanie Pollierer, Björn C. Rall, Stefan Scheu, Gesine Seelig and Ulrich Brose

Effects of environmental warming and drought on size-structured soil food webs

1224 Birgit Lang, Björn C. Rall, Stefan Scheu and Ulrich Brose

Forum and Editors Choice

Towards a cohesive, holistic view of top predation: a definition, synthesis and perspective

1234 Fabrizio Sergio, Oswald J. Schmitz, Charles J. Krebs, Robert D. Holt, Michael R. Heithaus, Aaron J. Wirsing, William J. Ripple, Euan Ritchie, David Ainley, Daniel Oro, Yadvendradev Jhala, Fernando Hiraldo and Erkki Korpimäki

Research

Interactive prey and predator diversity effects drive consumption rates

1244 Eva Knop, Jan Zünd and Dirk Sanders

Detecting phylogenetic signal in mutualistic interaction networks using a Markov process model

1250 H. O. Minoarivelo, C. Hui, J. S. Terblanche, S. L. Kosakovsky Pond and K. Scheffler

Patterns of pollen quantity and quality limitation of pre-zygotic reproduction in *Mimulus guttatus* vary with co-flowering community context

1261 Gerardo Arceo-Gómez and Tia-Lynn Ashman

General and specific responses of understory vegetation to cervid herbivory across a range of boreal forests

1270 James D. M. Speed, Gunnar Austrheim, Alison J. Hester, Erling L. Meisingset, Atle Mysterud, Jean-Pierre Tremblay, Dag-Inge Øien and Erling J. Solberg
