

# ORE GEOLOGY REVIEWS

## Journal for Comprehensive Studies of Ore Genesis and Ore Exploration

Affiliated with the International Association on the Genesis of Ore Deposits  
(IAGOD)

**Editor-in-Chief**  
**Franco Pirajno**

**VOL. 58**

**CONTENTS**

**APRIL 2014**

(Abstracted/indexed in: Current Contents, Mineralogical Abstracts, Geo Abstracts and Engineering Information Inc. Also covered in the abstract and citation database Scopus®. Full text available on ScienceDirect®.)

*Research Articles*

|                                                                                                                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Hydrothermal evolution in the Maher-Abad porphyry Cu–Au deposit, SW Birjand, Eastern Iran: Evidence from fluid inclusions<br>K. Siahcheshm, A.A. Calagari and A. Abedini                                                                          | 1   |
| Supergene enrichment of precious metals by natural amalgamation in the Las Cruces weathering profile (Iberian Pyrite Belt, SW Spain)<br>L. Yesares, R. Sáez, J.M. Nieto, G.R. de Almodóvar and S. Cooper                                          | 14  |
| The fault-controlled skarn W–Mo polymetallic mineralization during the main India–Eurasia collision: Example from Hahaigang deposit of Gangdese metallogenic belt of Tibet<br>X. Li, C. Wang, W. Mao, Q. Xu and Y. Liu                            | 27  |
| Zinc, sulfur and lead isotopic variations in carbonate-hosted Pb–Zn sulfide deposits, southwest China<br>J.-X. Zhou, Z.-L. Huang, M.-F. Zhou, X.-K. Zhu and P. Muchez                                                                             | 41  |
| The origin of Madagascar chromitites<br>G. Grieco, A. Merlini, M. Pedrotti, M. Moroni and R. Randrianja                                                                                                                                           | 55  |
| Geology, geochemistry, and genesis of orogenic gold–antimony mineralization in the Himalayan Orogen, South Tibet, China<br>W. Zhai, X. Sun, J. Yi, X. Zhang, R. Mo, F. Zhou, H. Wei and Q. Zeng                                                   | 68  |
| Garnierites and garnierites: Textures, mineralogy and geochemistry of garnierites in the Falcondo Ni–laterite deposit, Dominican Republic<br>C. Villanova-de-Benavent, J.A. Proenza, S. Galí, A. García-Casco, E. Tauler, J.F. Lewis and F. Longo | 91  |
| Genesis of Neoproterozoic Au-bearing volcanogenic sulfides and quartz veins in the Ar Rjum goldfield, Saudi Arabia<br>H.M. Harbi, A.A. Surour and G.J. Davidson                                                                                   | 110 |
| Petrogenesis and mineralization of the Fenghuangshan skarn Cu–Au deposit, Tongling ore cluster field, Lower Yangtze metallogenic belt<br>S. Li, X. Yang, Y. Huang and W. Sun                                                                      | 148 |
| Geology and genesis of the Hehuaping magnesian skarn-type cassiterite-sulfide deposit, Hunan Province, Southern China<br>Y. Yao, J. Chen, J. Lu, R. Wang and R. Zhang                                                                             | 163 |
| Compositional variations of chromite and solid inclusions in ophiolitic chromitites from the southeastern Turkey: Implications for chromitite genesis<br>R.M. Akmaz, I. Uysal and S. Saka                                                         | 208 |
| CH <sub>4</sub> –N <sub>2</sub> in the Maldon gold deposit, central Victoria, Australia<br>B. Fu, T.P. Mernagh, A.M. Fairmaid, D. Phillips and M.A. Kendrick                                                                                      | 225 |
| The Mokrsko-West gold deposit, Bohemian Massif, Czech Republic: Mineralogy, deposit setting and classification<br>J. Zachariáš, P. Morávek, P. Gadas and J. Pertoldová                                                                            | 238 |

*Review Articles*

|                                                                                                                                                                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Characterization of apatite resources in Norway and their REE potential — A review<br>P.M. Ihlen, H. Schiellerup, H. Gautneb and Ø. Skår                                                                                                                                  | 126 |
| Base and precious metal mineralization in Middle Jurassic rocks of the Lesser Caucasus: A review of geology and metallogeny and new data from the Kapan, Alaverdi and Mehmana districts<br>J. Mederer, R. Moritz, S. Zohrabyan, A. Vardanyan, R. Melkonyan and A. Ulianov | 185 |
