ORGANOMETALLICS

January 26, 2015: Vol. 34, Iss. 2

Content

1. Nickel(II) Pincer Carbene Complexes: Oxidative Addition of an Aryl C–H Bond to Form a Ni(II) Hydride

Ellen M. Matson, Gabriel Espinosa Martinez, Abdulrahman D. Ibrahim, Bailey J. Jackson, Jeffrey A. Bertke, and Alison R. Fout
Organometallics **2015** 34 (2), 399-407

2. Structural and Electronic Variations of sp/sp² Carbon-Based Bridges in Di- and Trinuclear Redox-Active Iron Complexes Bearing Fe(diphosphine)₂X (X = I, NCS) Moieties

Franziska Lissel, Olivier Blacque, Koushik Venkatesan, and Heinz Berke
Organometallics **2015** 34 (2), 408-418

3. Synthesis of Homoleptic and Heteroleptic Bis-N-heterocyclic Carbene Group 11 Complexes

Faïma Lazreg, David B. Cordes, Alexandra M. Z. Slawin, and Catherine S. J. Cazin
Organometallics **2015** 34 (2), 419-425

4. DFT Study on the Impact of the Methylaluminoxane Cocatalyst in Ethylene Oligomerization Using a Titanium-Based Catalyst

Farhan Ahmad Pasha, Jean-Marie Basset, Hervé Toulhoat, and Theodorus de Bruin
Organometallics **2015** 34 (2), 426-431

5. Markovnikov-Selective Hydrosilylation of Electron-Deficient Alkenes with Arylsilanes Catalyzed by Mono(phosphine)palladium(0)

Nobuyuki Komine, Makoto Abe, Ryoko Suda, and Masafumi Hirano
Organometallics **2015** 34 (2), 432-437

6. Uncovering the Mechanism of Homogeneous Methyl Methacrylate Formation with P,N Chelating Ligands and Palladium: Favored Reaction Channels and Selectivities

Luke Crawford, David J. Cole-Hamilton, and Michael Bühl
Organometallics **2015** 34 (2), 438-449

7. Simple Synthesis, Halogenation, and Rearrangement of closo-1,6-C₂B₈H₁₀

Mario Bakardjiev, Bohumil Štíbr, Josef Holub, Zdenka Padělková, and Aleš Růžička
Organometallics **2015** 34 (2), 450-454

8. Synthesis of Heterocyclic-Fused Cyclopentadienyl Scandium Complexes and the Catalysis for Copolymerization of Ethylene and Dicyclopentadiene

Runhai Chen, Changguang Yao, Meiyang Wang, Hongyan Xie, Chunji Wu, and Dongmei Cui
Organometallics 2015 34 (2), 455-461

9. Salts of the Dianions $[\text{Hg}(\text{12-X-closo-1-CB}_{11}\text{H}_{10})_2]^{2-}$ ($\text{X} = \text{I}, \text{C}\equiv\text{CH}, \text{C}\equiv\text{CFc}, \text{C}\equiv\text{CSiPr}_3$): Synthesis and Spectroscopic and Structural Characterization

Alexander Himmelspace, Jonas Warneke, Marius Schäfer, Michael Hailmann, and Maik Finze
Organometallics 2015 34 (2), 462-469

10. A Scandium Complex Bearing Both Methylidene and Phosphinidene Ligands: Synthesis, Structure, and Reactivity

Jiliang Zhou, Tengfei Li, Laurent Maron, Xuebing Leng, and Yaofeng Chen
Organometallics 2015 34 (2), 470-476

11. Metal and Ligand-Substituent Effects in the Immortal Polymerization of rac-Lactide with Li, Na, and K Phenoxo-imine Complexes

Francisco M. García-Valle, Robert Estivill, Carlos Gallegos, Tomás Cuenca, Marta E. G. Mosquera, Vanessa Taberner, and Jesús Cano
Organometallics 2015 34 (2), 477-487

12. Dimethylcuprate-Mediated Transformation of Acetate to Dithioacetate

Jiawei Li, George N. Khairallah, and Richard A. J. O'Hair
Organometallics 2015 34 (2), 488-493

13. Multimetallic Alkenyl Complexes Bearing Macrocyclic Dithiocarbamate Ligands

Anita Toscani, Eeva K. Heliövaara, Jubeda B. Hena, Andrew J. P. White, and James D. E. T. Wilton-Ely
Organometallics 2015 34 (2), 494-505

14. 1,2-Bis(di-tert-butylphosphino)imidazole (dtbpi): A Versatile Imidazole-Based, Rigid, Bulky Bisphosphine Ligand for Transition Metals

Marcel Brill, Frank Rominger, and Peter Hofmann
Organometallics 2015 34 (2), 506-521

15. N-Heterocyclic-Carbene Complexes Readily Prepared from Di- μ -hydroxopalladacycles Catalyze the Suzuki Arylation of 9-Bromophenanthrene

J. Luis Serrano, José Pérez, Luis García, Gregorio Sánchez, Joaquín García, Pedro Lozano, Vidya Zende, and Anant Kapdi
Organometallics **2015** *34* (2), 522-533

16. Reactivity of N,C,N-Chelated Antimony(III) and Bismuth(III) Chlorides with Lithium Reagents: Addition vs Substitution

Iva Vránová, Roman Jambor, Aleš Růžička, Robert Jirásko, and Libor Dostál
Organometallics **2015** *34* (2), 534-541
