## Structure and Properties of Condensed Matter

**Special Issue:**

International Workshop on Packing Problems

**Guest Editor:**

S. Hutzler

**Associate Guest Editors:**

T. Aste, H.-K. Chan, W. Drenckhan and A. Mughal

## Contents

	Page
<b>Special Issue</b> <b>International Workshop on Packing Problems</b>	
<b>Preface</b>	3939
<b>Articles</b>	
Bernal's road to random packing and the structure of liquids <i>J.I. Finney</i>	3940
From spherical circle coverings to the roundest polyhedra <i>T. Tarnai, Z. Gáspár and A. Lengyel</i>	3970
Self-referential order <i>T. Aste, P. Butler and T. Di Matteo</i>	3983
Set Voronoi diagrams of 3D assemblies of aspherical particles <i>F.M. Schaller, S.C. Kapfer, M.E. Evans, M.J.F. Hoffmann, T. Aste, M. Saadatfar, K. Mecke, G.W. Delaney and G.E. Schröder-Turk</i>	3993
Size-topology correlations in disk packings: terminal bidispersity in order–disorder transitions <i>S. Hilgenfeldt</i>	4018
Mean-field granocentric approach in 2D & 3D polydisperse, frictionless packings <i>C.B. O'Donovan, E.I. Corwin and M.E. Möbius</i>	4030
A hybrid helical structure of hard-sphere packing from sequential deposition <i>H.-K. Chan</i>	4057
Screw symmetry in columnar crystals <i>A. Mughal</i>	4070
Tapped granular packings described as complex networks <i>R. Arévalo, I.A. Pugnaloni, D. Maza and I. Zuriguel</i>	4078
Characteristics of large three-dimensional heaps of particles produced by ballistic deposition from extended sources <i>N. Topic, J.A.C. Gallas and T. Pöschel</i>	4090
Jamming and crystallization in athermal polymer packings <i>N.Ch. Karayiannis, K. Foteinopoulou and M. Laso</i>	4108
A commentary on the historical background to the modern study of foam structures <i>D. Weaire</i>	4132
Building the pyramids: perfect bubble crystals <i>A.J. Meagher, D. McAteer, S. Hutzler and D. Weaire</i>	4138

Compaction of cereal grain <i>J. Wychowaniec, I. Griffiths, A. Gay and A. Mughal</i>	4151
Thermodynamic status of random close packing <i>L.V. Woodcock</i>	4159
