Structure and Properties of Condensed Matter

Philosophical Magazine

Volume 94 July 2014 Numbers 19–21

Contents

	Page
Issue 19	
Part A : Materials Science	
The effects of elastic interactions on precipitate microstructural evolution in elastically inhomogeneous nickel-base alloys <i>A.J. Ardell</i>	2101
Multiscale thermodynamic analysis on fracture toughness loss induced by solute segregation in steel <i>M. Yamaguchi and J. Kameda</i>	2131
Grüneisen analysis of thermodynamic properties of δ -phase Pu–Ga alloys <i>A.C. Lawson</i>	2150
The interplay of morphological and compositional evolution in crystal growth: a phase-field model <i>R. Backofen, R. Bergamaschini and A. Voigt</i>	2162
Radiation-induced glide motion of interstitial clusters in concentrated alloys <i>Y. Satoh, H. Abe and T. Matsunaga</i>	2170
Photo- and cathodoluminescence of the cetylpyridinium chloride: ZnO nanocomposites <i>M.M. Omelchenko, M.R. Panasyuk and V.B. Kapustianyk</i>	2188
Part B: Condensed Matter Physics	
Exact ground state for the four-electron problem in a 2D finite honeycomb lattice <i>R. Trencsényi, K. Glukhov and Z. Gulácsi</i>	2195
Issue 20	
Part A: Materials Science	
Interactions between edge lattice dislocations and $\Sigma 11$ symmetrical tilt grain boundary: comparisons among several FCC metals and interatomic potentials <i>W. Yu and Z. Wang</i>	2224
Atomistic modelling of hydrogen segregation to the $\Sigma 9\{2\ 2\ 1\}[1\ 1\ 0]$ symmetric tilt grain boundary in Al <i>X.J. Shen, D. Tanguy and D. Connétable</i>	2247
Length scale effect on the deformation microstructures of grown-in twins in copper <i>Q. Lu, M. Sui, X. Huang, D. Li and N. Hansen</i>	2262
Annealing of paramagnetic centres in electron- and ion-irradiated yttria-stabilized zirconia: effect of yttria content <i>J.-M. Costantini, F. Beuneu and W.J. Weber</i>	2281

Modelling of martensite slip and twinning in NiTiHf shape memory alloys <i>J. Wang and H. Sehitoglu</i>	2297
On the effective permeability of a heterogeneous porous medium: the role of the geometric mean <i>P.A. Selvadurai and A.P.S. Selvadurai</i>	2318
New amorphous interface for precipitate nitrides in steel <i>H.K. Danielsen, S. Kadkhodasadeh, F.B. Grumsen and M.A.J. Somers</i>	2339
Issue 21	
Part A: Materials Science	
Effects of cooling rate on the microstructure and solute partitioning in near eutectoid Ti–Cu alloys <i>R.J. Contieri, E.S.N. Lopes, R. Caram, A. Devaraj, S. Nag and R. Banerjee</i>	2350
Single crystal growth from light, volatile and reactive materials using lithium and calcium flux <i>A. Jesche and P.C. Canfield</i>	2372
A new metastable precipitate phase in Mg–Gd–Y–Zr alloy <i>H. Zhou, W.Z. Xu, W.W. Jian, G.M. Cheng, X.L. Ma, W. Guo, S.N. Mathaudhu, Q.D. Wang and Y.T. Zhu</i>	2403
The effect of Zn on precipitation in Al–Mg–Si alloys <i>T. Saito, S. Wenner, E. Osmundsen, C.D. Marioara, S.J. Andersen, J. Røyset, W. Lefebvre and R. Holmestad</i>	2410
Effect of orientations on <i>in situ</i> tensile deformation and fracture behaviours of nickel-base single-crystal superalloys <i>P. Li, B.M. Zhou, Y.Z. Zhou, J.G. Li, T. Jin, X.F. Sun and Z.F. Zhang</i>	2426
Determination of trapping–detrapping events, recombination processes and gap-state parameters by modulated photocurrent measurements on amorphous silicon <i>M. Pomoni and P. Kounavis</i>	2447
Size effect on the mechanical behaviour of polycrystalline copper microbeams <i>S. Lefebvre, B. Devincere, P. Aubert and T. Hoc</i>	2472
