Structure and Properties of Condensed Matter

Taylor & Francis
Taylor & Francis Group

Philosophical Magazine

Volume 94 February 2014 Numbers 4–6

Contents

	Page
Issue 4	
Part A: Materials Science	
Recording ion channels across soy-extracted lecithin bilayer generated by water-soluble quantum dots <i>R. Sarma and D. Mohanta</i>	345
Crystallographic texture and microstructure evolution during hot compression of Ti–6Al–4V–0.1B alloy in the ($\alpha+\beta$)-regime <i>S. Roy, R. Madhavan and S. Suwas</i>	358
A study of the hot and cold deformation of twin-roll cast magnesium alloy AZ31 <i>H. Askari, J. Young, D. Field, G. Kridli, D. Li and H. Zbib</i>	381
Application of random walk concept to the cyclic diffusion mechanisms for self-diffusion in intermetallic compounds <i>G.P. Tiwari, R.S. Mehrotra and Y. Iijima</i>	404
Comparative TEM study on as-cast ingot and nodular bainite of Cu-14.9%Sn alloy <i>Z.-J. Wang and T.J. Konno</i>	420
Issue 5	
Part A: Materials Science	
Lattice dynamics study of the structural transition in IrTe ₂ <i>L. Zhang, X. Zhu, L. Ling, C. Zhang, L. Pi and Y. Zhang</i>	439
On the absence of shear cracking and grain boundary cavitation in secondary tensile regions of Ti–6Al–4V–0.1B alloy during hot ($\alpha+\beta$)-compression <i>S. Roy and S. Suwas</i>	447
First-principles density functional theory study of generalized stacking faults in TiN and MgO <i>S.K. Yadav, X.-Y. Liu, J. Wang, R. Ramprasad, A. Misra and R.G. Hoagland</i>	464
Annealing behaviour of ultrafine-grained aluminium <i>P.-L. Sun, Y. Zhao, T.-Y. Tseng, J.-R. Su and F.J. Lavernia</i>	476
Surface/interface effects on the formation of misfit dislocation in a core–shell nanowire <i>C. Enzevaee, M.Yu. Gutkin and H.M. Shodja</i>	492
Aberration-corrected HAADF-STEM investigations of precipitate structures in Al–Mg–Si alloys with low Cu additions <i>T. Saito, C.D. Marioara, S.J. Andersen, W. Lefebvre and R. Holmestad</i>	520

Issue 6

Part A: Materials Science

A negative-stiffness phase in elastic composites can produce stable extreme effective dynamic but not static stiffness <i>C.S. Wojnar and D.M. Kochmann</i>	532
Composition and orientation relationships of constituent particles in 3xxx aluminum alloys <i>A.M.F. Muggerud, Y. Li and R. Holmestad</i>	556
Phase ordering kinetics of second-phase formation near an edge dislocation <i>C. Bjerkén and A.R. Massih</i>	569
Covariant hysteretic constitutive theory for Maxwell's equations: application to axially rotating media <i>A.C. Hale and R.W. Tucker</i>	594
The Kirkendall effect in single-phase multicomponent systems: dependence on drift and entropy distribution <i>B. Wierzba</i>	611
