THIRD SERIES, VOLUME 87, NUMBER 2
PARTS A AND B

CONTENTS

FEBRUARY 2013

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages 020101(R)-022604, and Part B pages 022701-029905(E).

PART A

RAPID COMMUNICATIONS

Statistical Physics

Scaling theory of heat transport in quasi-one-dimensional disordered harmonic chains *(5 pages)* ..... 020101(R)
Joshua D. Bodyfelt, Mei C. Zheng, Ragnar Fleischmann, and Tsampikos Kottos

Scale-invariant growth processes in expanding space *(5 pages)* ..... 020102(R)
Adnan Ali, Robin C. Ball, Stefan Grosskinsky, and Ellák Somfai

Anomalous field-induced growth of fluctuations in dynamics of a biased intruder moving in a quiescent medium *(5 pages)* ..... 020103(R)
Olivier Bénichou, Carlos Mejía-Monasterio, and Gleb Oshanin

Everlasting initial memory threshold for rare events in equilibration processes *(4 pages)* ..... 020104(R)
J. S. Lee, Chulan Kwon, and Hyunggyu Park

Superdiffusive trajectories in Brownian motion *(4 pages)* ..... 020105(R)
Jérôme Duplat, Simon Kheifets, Tongcang Li, Mark G. Raizen, and Emmanuel Villermaux

Weighted networks as randomly reinforced urn processes *(4 pages)* ..... 020106(R)
Guido Caldarelli, Alessandro Chessa, Irene Crimaldi, and Fabio Pammolli

Granular Materials

Rheology and shear band suppression in particle and chain mixtures *(4 pages)* ..... 020201(R)
I. Regev and C. Reichhardt

Colloids and Complex Fluids

Three-body fluctuation-induced interaction at fluid interfaces: A strong deviation from the pairwise summation *(5 pages)* ..... 020301(R)
Ehsan Noruzifar, Jef Wagner, and Roya Zandi

Copyright 2013 by American Physical Society

(Continued)

1539-3755(201302)87:2:A;1-L

PHYSICAL REVIEW E THIRD SERIES, VOLUME 87, NUMBER 2 FEBRUARY 2013

Films, Interfaces, and Crystal Growth

Activated vibrational modes and Fermi resonance in tip-enhanced Raman spectroscopy *(5 pages)* ..... 020401(R)
Mengtao Sun, Yurui Fang, Zhenyu Zhang, and Hongxing Xu

Geometry-induced phase transition in fluids: Capillary prewetting *(4 pages)* ..... 020402(R)
Petr Yatsyshin, Nikos Savva, and Serafim Kalliadasis

Liquid Crystals

Modulated phase of liquid crystals: Covariant elasticity in the context of soft, achiral smectic-*C* materials *(4 pages)* 020501(R)
P. R. Venkatramanan, Yashodhan Hatwalne, and N. V. Madhusudana

Modeling the polydomain-monodomain transition of liquid crystal elastomers *(5 pages)* ..... 020502(R)
Jonathan K. Whitmer, Tyler F. Roberts, Raj Shekhar, Nicholas L. Abbott, and Juan J. de Pablo

Biological Physics

Biogenic crust dynamics on sand dunes *(5 pages)* ..... 020701(R)
Shai Kinast, Ehud Meron, Hezi Yizhaq, and Yosef Ashkenazy

Nonlinear Dynamics and Chaos

Golden spirals as phyllotactic arrangements of optical patterns *(4 pages)* ..... 020901(R)
F. Haudin and S. Residori

Fidelity of the quantum δ-kicked accelerator *(4 pages)* ..... 020902(R)
R. K. Shrestha, S. Wimberger, J. Ni, W. K. Lam, and G. S. Summy

Fluid Dynamics

Propulsion mechanisms for Leidenfrost solids on ratchets *(4 pages)* ..... 021001(R)
Tobias Baier, Guillaume Dupeux, Stefan Herbert, Steffen Hardt, and David Quéré

Computational Physics

Path-integral Monte Carlo method for the local Z_2 Berry phase *(5 pages)* ..... 021301(R)
Yuichi Motoyama and Synge Todo

ARTICLES

Statistical Physics

Coupling-parameter expansion in thermodynamic perturbation theory *(7 pages)* 022101
A. Sai Venkata Ramana and S. V. G. Menon

Ising ferromagnet in dimension five: Link and spin overlaps *(5 pages)* 022102
P. H. Lundow and I. A. Campbell

Locally self-similar phase diagram of the disordered Potts model on the hierarchical lattice *(7 pages)* 022103
J-Ch. Anglès d'Auriac and Ferenc Iglói

Phase transition of light on complex quantum networks *(8 pages)* 022104
Arda Halu, Silvano Garnerone, Alessandro Vezzani, and Ginestra Bianconi

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 87, NUMBER 2 FEBRUARY 2013

Directed transport induced by α-stable Lévy noises in weakly asymmetric periodic potentials *(6 pages)* 022105
S. Risau-Gusman, S. Ibáñez, and S. Bouzat

NVU perspective on simple liquids' quasiuniversality *(9 pages)* 022106
Jeppe C. Dyre

Information-theoretic approach to ground-state phase transitions for two- and three-dimensional frustrated spin systems *(10 pages)* 022107
O. Melchert and A. K. Hartmann

Optimal transport and von Neumann entropy in a Heisenberg *XXZ* chain out of equilibrium *(8 pages)* 022108
Mario Salerno and Vladislav Popkov

Work relations for time-dependent states *(5 pages)* 022109
Naoko Nakagawa and Shin-ichi Sasa

Dynamical theory of spin relaxation *(13 pages)* 022110
Timothy R. Field and Alex D. Bain

Effect of dimensionality on the percolation threshold of overlapping nonspherical hyperparticles *(16 pages)* 022111
S. Torquato and Y. Jiao

Power fluctuation theorem for a Brownian harmonic oscillator *(7 pages)* 022112
J. I. Jiménez-Aquino and R. M. Velasco

Dynamic approach to finite-temperature magnetic phase transitions in the extended J_1-J_2 model with vacancy order *(9 pages)* 022113
N. J. Zhou, B. Zheng, and J. H. Dai

Characterizing correlations with full counting statistics: Classical Ising and quantum *XY* spin chains *(5 pages)* 022114
Dmitri A. Ivanov and Alexander G. Abanov

Universality class of the two-dimensional randomly distributed growing-cluster percolation model *(9 pages)* 022115
O. Melchert

Complex dynamics and scale invariance of one-dimensional memristive networks *(8 pages)* 022116
Yuriy V. Pershin, Valeriy A. Slipko, and Massimiliano Di Ventra

Limiting distributions of continuous-time random walks with superheavy-tailed waiting times *(13 pages)* 022117
S. I. Denisov, Yu. S. Bystrik, and H. Kantz

Effect of partial absorption on diffusion with resetting *(7 pages)* 022118
Justin Whitehouse, Martin R. Evans, and Satya N. Majumdar

Equilibrium and nonequilibrium molecular dynamics simulations of thermal conductance at solid-gas interfaces *(7 pages)* 022119
Zhi Liang, William Evans, and Pawel Keblinski

Holey random walks: Optics of heterogeneous turbid composites *(12 pages)* 022120
Tomas Svensson, Kevin Vynck, Marco Grisi, Romolo Savo, Matteo Burresi, and Diederik S. Wiersma

Dynamical properties of random-field Ising model *(7 pages)* 022121
Suman Sinha and Pradipta Kumar Mandal

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 87, NUMBER 2** **FEBRUARY 2013**

Classical heat transport in anharmonic molecular junctions: Exact solutions *(7 pages)* 022122
Sha Liu, Bijay Kumar Agarwalla, Jian-Sheng Wang, and Baowen Li

Shape-dependent finite-size effect of the critical two-dimensional Ising model on a triangular lattice *(7 pages)* ... 022124
Xintian Wu, Nickolay Izmailian, and Wenan Guo

Fluctuation-response relations for nonequilibrium diffusions with memory *(11 pages)* 022125
C. Maes, S. Safaverdi, P. Visco, and F. van Wijland

Universal fluctuations and extreme statistics of avalanches near the depinning transition *(13 pages)* 022126
Michael LeBlanc, Luiza Angheluta, Karin Dahmen, and Nigel Goldenfeld

Learning and inference in a nonequilibrium Ising model with hidden nodes *(7 pages)* 022127
Benjamin Dunn and Yasser Roudi

Information theoretic aspects of the two-dimensional Ising model *(11 pages)* 022128
Hon Wai Lau and Peter Grassberger

Quantum collapse and the second law of thermodynamics *(9 pages)* 022129
Sahand Hormoz

Thermodynamic Casimir forces between a sphere and a plate: Monte Carlo simulation of a spin model *(15 pages)* 022130
Martin Hasenbusch

Cluster properties of the one-dimensional lattice gas: The microscopic meaning of grand potential *(7 pages)* 022131
Agata Fronczak

Exact solutions of kinetic equations in an autocatalytic growth model *(5 pages)* 022132
Jakub Jędrak

Disordered contact process with asymmetric spreading *(9 pages)* 022133
Róbert Juhász

Critical phenomena in heterogeneous k-core percolation *(9 pages)* 022134
Davide Cellai, Aonghus Lawlor, Kenneth A. Dawson, and James P. Gleeson

Supercooled liquids: Equivalence between mode-coupling theory and the replica approach *(6 pages)* 022135
Tommaso Rizzo

Long-range and many-body effects in coagulation processes *(13 pages)* 022136
Anton A. Winkler and Erwin Frey

Mass dependence of instabilities of an oscillator with multiplicative and additive noise *(9 pages)* 022137
Moshe Gitterman and David A. Kessler

Work fluctuations for a Brownian particle in a harmonic trap with fluctuating locations *(16 pages)* 022138
Arnab Pal and Sanjib Sabhapandit

Optimum analysis of a Brownian refrigerator *(5 pages)* 022139
X. G. Luo, N. Liu, and J. Z. He

Yang-Lee zeros and the critical behavior of the infinite-range two- and three-state Potts models *(10 pages)* 022140
Zvonko Glumac and Katarina Uzelac

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 87, NUMBER 2 FEBRUARY 2013

Anomalous statistics of random relaxations in random environments *(12 pages)* 022141
Iddo Eliazar and Ralf Metzler

Extrema statistics in the dynamics of a non-Gaussian random field *(8 pages)* 022142
T. H. Beuman, A. M. Turner, and V. Vitelli

Thermodynamic length for far-from-equilibrium quantum systems *(7 pages)* 022143
Sebastian Deffner and Eric Lutz

Robust unidirectional rotation in three-tooth Brownian rotary ratchet systems *(15 pages)* 022144
Hiroki Tutu and Soichiro Nagata

From Langevin to generalized Langevin equations for the nonequilibrium Rouse model *(9 pages)* 022145
Christian Maes and Simi R. Thomas

Mass transport perspective on an accelerated exclusion process: Analysis of augmented current and unit-velocity phases *(12 pages)* 022146
Jiajia Dong, Stefan Klumpp, and R. K. P. Zia

Granular Materials

Linear hydrodynamics for driven granular gases *(17 pages)* 022201
María Isabel García de Soria, Pablo Maynar, and Emmanuel Trizac

Shallow granular flows down flat frictional channels: Steady flows and longitudinal vortices *(12 pages)* 022202
Nicolas Brodu, Patrick Richard, and Renaud Delannay

Contact network topology in tapped granular media *(9 pages)* 022203
Roberto Arévalo, Luis A. Pugnaloni, Iker Zuriguel, and Diego Maza

Phase transition in an out-of-equilibrium monolayer of dipolar vibrated grains *(7 pages)* 022204
Loreto Oyarte, Pablo Gutiérrez, Sébastien Aumaître, and Nicolás Mujica

Role of collisions in erosion of regolith during a lunar landing *(14 pages)* 022205
Kyle J. Berger, Anshu Anand, Philip T. Metzger, and Christine M. Hrenya

Effects of cohesion on the flow patterns of granular materials in spouted beds *(10 pages)* 022206
Runru Zhu, Shuiqing Li, and Qiang Yao

Glass transition in driven granular fluids: A mode-coupling approach *(14 pages)* 022207
W. T. Kranz, M. Sperl, and A. Zippelius

Microstructure-statistics-property relations of anisotropic polydisperse particulate composites using tomography *(19 pages)* 022208
A. Gillman, K. Matouš, and S. Atkinson

Hydrodynamic modes in a confined granular fluid *(12 pages)* 022209
Ricardo Brito, Dino Risso, and Rodrigo Soto

Shearing instability of a dilute granular mixture *(9 pages)* 022210
J. Javier Brey and M. J. Ruiz-Montero

Boltzmann statistics in a three-dimensional vibrofluidized granular bed: Idealizing the experimental system *(5 pages)* 022211
C. R. K. Windows-Yule and D. J. Parker

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 87, NUMBER 2 FEBRUARY 2013

Colloids and Complex Fluids

Enhanced thermal transport through a soft glassy nanodisk paste (6 pages) 022301
Susheel S. Bhandari, K. Muralidhar, and Yogesh M. Joshi

Electrophoretic mobility and charge inversion of a colloidal particle studied by single-colloid electrophoresis and molecular dynamics simulations (7 pages) 022302
Ilya Semenov, Shervin Raafatnia, Marcello Sega, Vladimir Lobaskin, Christian Holm, and Friedrich Kremer

High-frequency propagating density fluctuations in deeply supercooled water: Evidence of a single viscous relaxation (6 pages) 022303
F. Aliotta, J. Gapiński, M. Pochylski, R. C. Ponterio, F. Saija, G. Salvato, and C. Vasi

Kinetically driven ordered phase formation in binary colloidal crystals (7 pages) 022304
D. Bochicchio, A. Videcoq, and R. Ferrando

Effect of gold nanoparticles on structure and dynamics of binary Lennard-Jones liquid: Direct space analysis (8 pages) 022305
L. Separdar and S. Davatolhagh

Vacancy diffusion in colloidal crystals as determined by dynamical density-functional theory and the phase-field-crystal model (6 pages) 022306
Sven van Teeffelen, Cristian Vasile Achim, and Hartmut Löwen

Transient shear banding in time-dependent fluids (5 pages) 022307
Xavier Illa, Antti Puisto, Arttu Lehtinen, Mikael Mohtaschemi, and Mikko J. Alava

Colloidal lattice shearing and rupturing with a driven line of particles (10 pages) 022308
A. Libál, B. M. Csíki, C. J. Olson Reichhardt, and C. Reichhardt

Structure of phase-separated athermal colloid-polymer systems in the protein limit (9 pages) 022309
Nathan A. Mahynski, Barry Irick, and Athanassios Z. Panagiotopoulos

Direct numerical simulations of anisotropic diffusion of spherical particles in sedimentation (11 pages) 022310
Adnan Hamid and Ryoichi Yamamoto

Films, Interfaces, and Crystal Growth

Existence of a bending rigidity for a hard-sphere liquid near a curved hard wall: Validity of the Hadwiger theorem (9 pages) 022401
Edgar M. Blokhuis

Interaction between heterogeneously charged surfaces: Surface patches and charge modulation (10 pages) 022402
Dan Ben-Yaakov, David Andelman, and Haim Diamant

Bias-dependent model of the electrical impedance of ionic polymer-metal composites (16 pages) 022403
Youngsu Cha and Maurizio Porfiri

Phase-field-crystal study of solute trapping (10 pages) 022404
Harith Humadi, Jeffrey J. Hoyt, and Nikolas Provatas

Self-organized pathways to nanopatterns exploiting the instabilities of ultrathin confined bilayers (15 pages) 022405
Abhiram Hens, Kartick Mondal, and Dipankar Bandyopadhyay

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 87, NUMBER 2 FEBRUARY 2013

Classical nucleation theory with a radius-dependent surface tension: A two-dimensional lattice-gas automata model *(14 pages)* 022406
Joseph Hickey and Ivan L'Heureux

Interfacial roughening in nonideal fluids: Dynamic scaling in the weak- and strong-damping regime *(11 pages)* 022407
Markus Gross and Fathollah Varnik

Nonlinear dynamics of island coarsening and stabilization during strained film heteroepitaxy *(16 pages)* 022408
Champika G. Gamage and Zhi-Feng Huang

Thin liquid film flow over substrates with two topographical features *(15 pages)* 022409
A. Mazloomi and A. Moosavi

Liquid Crystals

Critical anomalies in thermal diffusivity of liquid-crystalline terephthal-bis-(4-*n*-butylaniline) *(5 pages)* 022501
Junko Morikawa, Toshimasa Hashimoto, Akira Kishi, Yoshio Shinoda, Kenji Ema, and Hideo Takezoe

Elastic mediated force between nanoparticles adsorbed on smectic films under an external field *(7 pages)* 022502
Maria S. S. Pereira, Marcelo L. Lyra, and Italo N. de Oliveira

Cholesteric pitch transitions induced by mechanical strain *(7 pages)* 022503
I. Lelidis, G. Barbero, and A. L. Alexe-Ionescu

Polarity-sensitive transient patterned state in a twisted nematic liquid crystal driven by very low frequency fields *(11 pages)* 022504
K. S. Krishnamurthy, Pramoda Kumar, and M. Vijay Kumar

Bioinspired model of mechanical energy harvesting based on flexoelectric membranes *(12 pages)* 022505
Alejandro D. Rey, P. Servio, and E. E. Herrera-Valencia

Metric approach for sound propagation in nematic liquid crystals *(6 pages)* 022506
E. Pereira, S. Fumeron, and F. Moraes

Optical properties of light-sensitive liquid-crystal elastomers in the vicinity of the nematic-paranematic phase transition *(7 pages)* 022507
Marko Gregorc, Hui Li, Valentina Domenici, Gabriela Ambrožič, Martin Čopič, and Irena Drevenšek-Olenik

First-order and continuous Fréedericksz transitions in cholesteric liquid crystals *(13 pages)* 022508
A. Yu. Val'kov, E. V. Aksenova, and V. P. Romanov

Smectic order, pinning, and phase transition in a smectic-liquid-crystal cell with a random substrate *(25 pages)* 022509
Quan Zhang and Leo Radzihovsky

Polymers

Intermittent stick-slip dynamics during the peeling of an adhesive tape from a roller *(8 pages)* 022601
Pierre-Philippe Cortet, Marie-Julie Dalbe, Claudia Guerra, Caroline Cohen, Matteo Ciccotti, Stéphane Santucci, and Loïc Vanel

Structural study of helical polyfluorene under high quasihydrostatic pressure *(9 pages)* 022602
M. Knaapila, Z. Konôpková, M. Torkkeli, D. Haase, H.-P. Liermann, S. Guha, and U. Scherf

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 87, NUMBER 2 FEBRUARY 2013

Isobars, the coexistence curve, and the critical exponent β of N-isopropylacrylamide gels obtained using a simple experimental method *(7 pages)* 022603
Kohei D. Arai (新井 康平), Azusa Saito (齊藤 梓), Kazuki Ito (伊藤 和樹), Yuuki Uematsu (植松 勇器), Takahiro Ueno (上野 貴裕), Yasuhiro Fujii (藤井 康裕), and Izumi Nishio (西尾 泉)

Adsorption of a single polymer chain on a surface: Effects of the potential range *(16 pages)* 022604
Leonid I. Klushin, Alexey A. Polotsky, Hsiao-Ping Hsu, Denis A. Markelov, Kurt Binder, and Alexander M. Skvortsov

PART B

Biological Physics

Simulation study of the role of the ribosomal exit tunnel on protein folding *(6 pages)* 022701
Changjun Chen, Ercheng Wang, Pengyu Liu, and Yi Xiao

Noisy transcription factor NF-κB oscillations stabilize and sensitize cytokine signaling in space *(5 pages)* 022702
Sirin W. Gangstad, Cilie W. Feldager, Jeppe Juul, and Ala Trusina

Modeling the interaction of DNA with alternating fields *(7 pages)* 022703
A. E. Bergues-Pupo, J. M. Bergues, and F. Falo

Evolutionary processes in finite populations *(10 pages)* 022704
Dirk M. Lorenz, Jeong-Man Park, and Michael W. Deem

Finite element modeling of the radiative properties of *Morpho* butterfly wing scales *(7 pages)* 022705
A. Mejdoubi, C. Andraud, S. Berthier, J. Lafait, J. Boulenguez, and E. Richalot

From free to effective diffusion coefficients in fluorescence correlation spectroscopy experiments *(12 pages)* 022706
Emiliano Pérez Ipiña and Silvina Ponce Dawson

Ventral-clap modes of hovering passerines *(11 pages)* 022707
Yu-Hung Chang, Shang-Chieh Ting, Jian-Yuan Su, Chyi-Yeou Soong, and Jing-Tang Yang

Competition between line tension and curvature stabilizes modulated phase patterns on the surface of giant unilamellar vesicles: A simulation study *(10 pages)* 022708
Jonathan J. Amazon, Shih Lin Goh, and Gerald W. Feigenson

Quantifying interactions between real oscillators with information theory and phase models: Application to cardiorespiratory coupling *(8 pages)* 022709
Yenan Zhu, Yee-Hsee Hsieh, Rishi R. Dhingra, Thomas E. Dick, Frank J. Jacono, and Roberto F. Galán

DNA kinks and bubbles: Temperature dependence of the elastic energy of sharply bent 10-nm-size DNA molecules *(6 pages)* 022710
Daniel S. Sanchez, Hao Qu, Delenda Bulla, and Giovanni Zocchi

Optimization of two- and three-link snakelike locomotion *(15 pages)* 022711
Fangxu Jing and Silas Alben

Three-dimensional structure determination protocol for noncrystalline biomolecules using x-ray free-electron laser diffraction imaging *(15 pages)* 022712
Tomotaka Oroguchi and Masayoshi Nakasako

(Continued)
