Volume 72, Issue 7
December 2025

PLANT PHYSIOLOGY

Special Issue: "Photosynthesis: Current Understanding of the Key Process in Biosphere" Guest Editors: Tatyana V. Savchenko, Anatoly A. Tsygankov, Andrew A. Khorobrykh, and Vasily V. Terentyev

15 articles in this issue

Tree Crown Structure and Leaf Surface Using Three Species of the Genus *Ulmus* L. as an Example

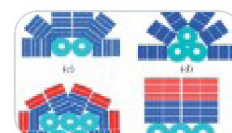

RESEARCH PAPERS | 16 December 2025 | Article: 260

Beyond the Red-Blue Paradigm: The Role of Green Light in Pod and Seed Tissues of Pea (*Pisum sativum* L.) Plants

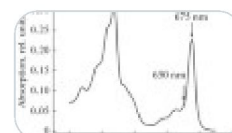

RESEARCH PAPERS | 16 December 2025 | Article: 259

Short-Term Light Adaptations in the Pigment Apparatus of Cyanobacteria. Role of Phycobilisomes

REVIEWS | Open access | 16 December 2025 | Article: 258

Kinetic Parameters for Dehydration Carbonic Anhydrase Activity of Photosystem 2 Core Complex from *Pisum sativum*

RESEARCH PAPERS | 16 December 2025 | Article: 257

Parameters of Photosynthetic Activity as Markers of Biotic Stress in *Chrysanthemum coreanunum* (H. Lév. & Vaniot) Nakai ex T. Mori

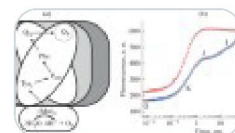

RESEARCH PAPERS | 16 December 2025 | Article: 256

The Impact of Magnesium Oxide Nanoparticles on the Growth Indicators, Pigment Content and Essential Oil Accumulation in *Ocimum basilicum* L.

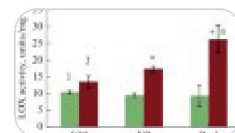

Dynamic Response of Photosystem II in *Chlorella vulgaris* to Heavy Metal Stress: Integrated Mathematical Analysis

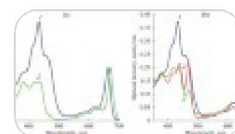

RESEARCH PAPERS | 16 December 2025 | Article: 254

Lipoxygenase Activity and Key Photosynthesis Parameters in Wheat *Triticum aestivum* L. under Different Water Supply Conditions

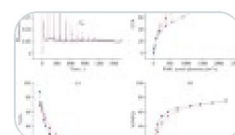

RESEARCH PAPERS | 16 December 2025 | Article: 253

Photooxidative Activity of Stress-Induced Plant Proteins of WSCP Family

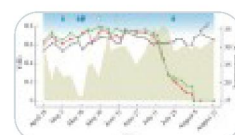

RESEARCH PAPERS | 16 December 2025 | Article: 252

The Negative Role of Jasmonic Acid in Wheat Tolerance to Excessive Light

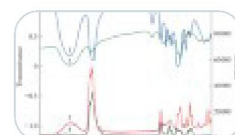

RESEARCH PAPERS | Open access | 16 December 2025 | Article: 251

Activity and Stress Tolerance of Nonfoliar Photosynthetic Apparatus of Grape Shoots during the Period of Active Vegetation

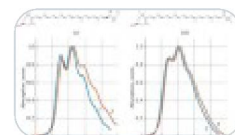

RESEARCH PAPERS | 16 December 2025 | Article: 250

Immobilization of the Green Microalgae *Chlamydomonas reinhardtii* Cells in Polyolsilane-Based Matrices Using Sol-Gel Synthesis

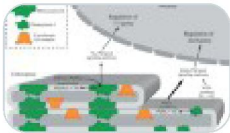

RESEARCH PAPERS | 16 December 2025 | Article: 249

The Overtones of the Carotenoid Vibrational Modes Significantly Improve the Quality of Optical Response Modeling

Networking of Plastoquinone Pool and Reactive Oxygen Species in Higher Plant Signaling

REVIEWS | 16 December 2025 | Article: 247

Investigation of Nonlinear Plant Response Determined by Chlorophyll Fluorescence to Periodic Saturating Light Flashes under Photoinhibition Conditions

RESEARCH PAPERS | 16 December 2025 | Article: 246
