## FEATURES

ON THE COVER

# World Changing Ideas

PAGE 40

**The Gene Genie** A new DNA tool will revolutionize medicine.

*By Margaret Knox*

**Atomic-Scale Legos**

*By Andre K. Geim*

**Also:** Reprogrammable cells.

Transparent organisms. Saliva-powered fuel cells. Vision-correcting displays. Ultrahard recyclable plastics. Wireless charging with sound waves. Capturing low-temperature waste heat. Fast, affordable holographic microscopy.

*By Ryan Bradley, Rachel Nuwer and Ben Fogelson*

## ASTRONOMY

### 54 Fossil Hunting in the Milky Way

To figure out how galaxies form, astronomers are digging up remnants of small galaxies that our Milky Way shredded and ate long ago.

*By Kathryn V. Johnston*

## MEDICINE

### 60 Pain That Won't Quit

New insights into the causes of chronic pain are leading to fresh ideas for combating it. *By Stephani Sutherland*

## CLIMATE

### 68 The Jet Stream Is Getting Weird

Dramatic changes in high-altitude winds could cause the extreme summers and winters of the past four years to become the norm. *By Jeff Masters*

## ARCHAEOLOGY

### 76 The Storm God's Tale

Newly discovered Maya artwork illuminates an ancient clash. *By Zach Zorich*

## IMMUNOLOGY

### 80 Immunity's Illusion

Mathematical simulations of flu infections suggest that an old—and somewhat odd—idea about how the immune system works might just be true.

*By Adam J. Kucharski*

## LIFE SCIENCE

### 86 The Spider's Charade

Studies of spiders that impersonate ants reveal that there is much more to the phenomenon of mimicry than meets the eye. *By Ximena Nelson*

## DEPARTMENTS

### 4 From the Editor

### 6 Letters

### 10 Science Agenda

To truly reduce violence, putting cameras on cops requires careful planning and research. *By the Editors*

### 12 Forum

We need a federal agency to smooth the integration of robotics into society. *By Ryan Calo*

### 15 Advances

Tackling climate change without national leaders. Bendable LEDs. NASA's next crewed craft. Plantibodies.

### 34 The Science of Health

Even very old people can sometimes benefit from aggressive cancer therapy. *By Claudia Wallis*

### 38 TechnoFiles

How Apple killed typing but still won the phone wars. *By David Pogue*

### 92 Recommended

Lost elements of the periodic table. Undocumented teenagers meet the American dream. Here lies King Richard III of England. *By Clara Moskowitz*

### 94 Skeptic

Who believes in conspiracy theories—and why. *By Michael Shermer*

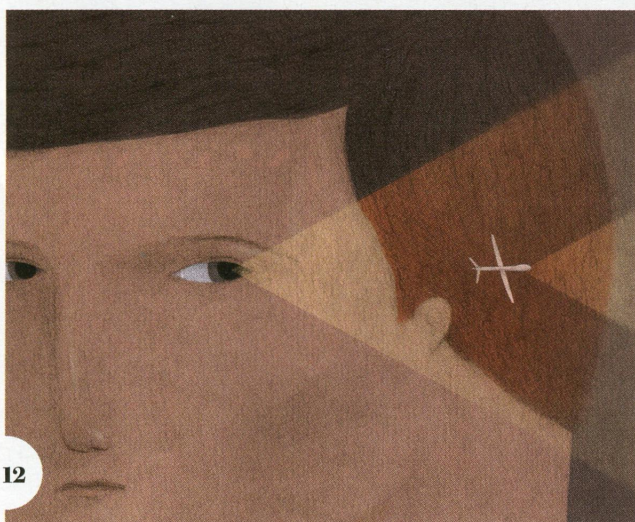

### 96 Anti Gravity

When it comes to publishing cultural icons, *Scientific American* thumps the *New York Times*. *By Steve Mirsky*

### 98 50, 100 & 150 Years Ago

### 100 Graphic Science

Population could hit 11 billion by 2100. *By Mark Fischetti*
