CONTENTS

Fast-Track Communications

D. Davelou, G. Kopidakis, G. Kioseoglou and I.N. Remediakis 42 MoS₂ nanostructures: Semiconductors with metallic edges

X.H. Zheng and D.G. Walmsley 56 New pairing scheme to overhaul BCS theory

Communications

W.-P. Li, S.-J. Li, J.-W. Yin, Y.-F. Yu and Z.-W. Wang 1 Spin relaxation assisted by optical phonon scattering in quantum dots: Dresselhaus versus Rashba spin-orbit coupling

N. Pote, C. Phadnis, K. Sonawane, V. Sudarsan and S. Mahamuni 6 The impact of lattice strain on optical properties of CdS nanocrystals

H. Liu and D. Chaudhary 10 Microstructure changes of on the extruded high-amylose bionanocomposites as affected by moisture content via synchrotron radiation studies

S.A. Bakar, N. Soltani, W.M.M. Yunus, E. Saion and A. Bahrami 15 Structural and paramagnetic behavior of spinel NiCr₂O₄ nanoparticles synthesized by thermal treatment method: Effect of calcination temperature

Y. Xiang and H.-S. Shen 20 Tension buckling of graphene: A new phenotype

A. Moradi 24 Extinction properties of an isolated C₆₀ molecule

H. Lee, S. Choi, S. Lee, T. Yoo, S. Lee, X. Liu and J.K. Furdyna 27 Effect of light illumination on the [100] uniaxial magnetic anisotropy of GaMnAs film

H. Gao, J. Lu, J. Zhao and X. Zhang 31 Magnetization dynamics and Gilbert damping in a hybrid Fe/GaAs heterostructure

J. Suda, O. Kamishima, J.-i. Kawamura, T. Hattori and M. Omiya 36 Phonon anharmonicity of phonon band gap effect of scheelite PbWO₄ studied by Raman spectrometry and first-principles calculations

M. Saint-Paul, C. Guttin, A. Abbassi, Z.-S. Wang, H. Luo, X. Lu, C. Ren, H.-H. Wen and K. Hasselbach 47 Surface impedance in the antiferromagnetic and superconducting states of underdoped BaFe_{1.93}Ni_{0.07}As₂ crystals

S. Othmani, M. Balli and A. Cheikhrouhou 51 Structural, magnetic and magnetocaloric properties of La_{0.6}Ca_{0.4}Mn_{1-x}Fe_xO₃ (x=0, 0.05, 0.1, 0.15 and 0.2) manganites

K. Vinod, A. Bharathi, A.T. Satya, S. Sharma, T.R. Devidas, A. Mani, A.K. Sinha, S.K. Deb, V. Sridharan and C.S. Sundar 60 Observation of superconductivity in SrMnBi₂ and Bi interface

B. Zhou, S. Dong, S. Chen, Z. Zhang, H. Zhao and P. Wu 64 Half metallicity and magnetic stability of *sp*-electron superlattices in rock-salt structure: A first-principles study

A.T. Apostolov, I.N. Apostolova and J.M. Wesselinowa 71 Dielectric constant of multiferroic pure and doped CuO nanoparticles

contents continued from outside back cover

B.V. Robouch, A. Marcelli, F. Cordeiro Raposo, P. Robouch, A. Kisiel and L. Di Giambattista	75	The complex stoichiometry of ternary alloys: What lies beyond the canonical Bernoulli distribution?
A.M. Ermolaev and G.I. Rashba	79	To the theory of plasma waves on the surface of nanotube with superlattice
Z. Li, Y. Su, G. Yun, K. Shi, X. Lv and B. Yang	82	Binder free synthesis of MnO ₂ nanoplates/graphene composites with enhanced supercapacitive properties
K. Li, T. Li, G. Du, D. Rémiens, X. Dong and G. Wang	89	Temperature dependence of dynamic hysteresis behavior in Pb _{0.4} Sr _{0.6} TiO ₃ ferroelectric films
A.P. Durajski and R. Szczechniak	93	Strong-coupling superconductivity in CaLi ₂ under the pressure of 100 GPa
