

Solid State Ionics

Volume 243, Pages 1-52 (15 July 2013)

Editorial Board

Page IFC

Hydrogen effects on oxidation behaviors of Haynes 230 in high temperature steam environments

Original Research Article

Pages 1-7

Donghoon Kim, Injin Sah, Ho Jung Lee, Changheui Jang

Structure, thermal stability and electrical conductivity of BINBVOX

Original Research Article

Pages 8-17

E.S. Buyanova, M.V. Morozova, Ju.V. Emelyanova, S.A. Petrova, R.G. Zakharov, N.V. Tarakina, V.M. Zhukovskiy

Lithium ion conductivity of Nd-doped (Li, La)TiO₃ ceramics

Original Research Article

Pages 18-21

Takashi Teranishi, Michihiro Yamamoto, Hidetaka Hayashi, Akira Kishimoto

Lithium insertion and extraction properties of hollandite-type K_xTiO₂ with different K content in the tunnel space

Original Research Article

Pages 22-29

Mitsumasa Sakao, Norihito Kijima, Junji Akimoto, Takeshi Okutani

Characterization of electrolyte layers of plasma-sprayed metal supported solid oxide fuel cells

Original Research Article

Pages 30-35

Steffen Wolf, Robert Adam, Lars Fuhrmann, Syed Asif Ansar, K. Andreas Friedrich

High Li ion conductivity in strontium doped $\text{Li}_7\text{La}_3\text{Zr}_2\text{O}_{12}$ garnet

Original Research Article

Pages 36-41

Alexandre Dumon, Mian Huang, Yang Shen, Ce-Wen Nan

Nucleation and crystallization kinetics of rapidly quenched lithium pyrophosphate glass

Original Research Article

Pages 42-49

Prashant Dabas, K. Hariharan

Addendum to "Currents under high driving forces" solid state ionics (in press) doi:10.1016/j.ssi.2012.11.019
