

TECHNICAL PHYSICS

С.-Петербург
ФТИ им. А.Ф. Иоффе

XXIX Симпозиум " Нанопфизика и нанозлектроника" , Нижний Новгород 10-14 марта 2025 г.

Фотоника

Akhmedzhanov R. A. , Gushchin L. A. , Zelensky I. V. , Nizov V. A., Nizov N. A., Sobgaida D. A.
Solid state quantum memory for optical signal at the single-photon level

1743

L.A. Nurtidinova, Leontyev A.V., E.O. Mityushkin, Bizyaev D. A. , Nurgazizov N. I., Chuklanov A. P., Kosach P. A., Zverev D. G., Nikiforov V. G.

Luminescence tomography of upconversion luminophores with discrete distribution

1749

Mokhov D.V., Berezovskaya T.N., Shubina K.Yu., Pirogov E.V., Prasolov N.D., Goray L.I., Bouravleuv A.D.
Fabrication of a blazed diffraction grating with variable line space

1757

W. Pauls , A.A. Chertovskikh

A computer algebra application for the solution of the ray tracing problem

1766

S.S. Morozov, M.Yu. Znamenskiy, S.A. Garakhin, M.V. Zorina, D.G. Reunov, B.A. Ulasevich, N.I. Chkhalo
Compact VLS-grating spectrograph for 3-20 nm range

1774

M.M. Barysheva, N.I. Chkhalo, Yu.A. Vainer, M.V. Zorina, M.S. Mikhailenko, R.M. Smertin
Applicability of white light interferometers for measuring X-ray optical component roughness

1781

Physical Electronics

Fedorov L.Yu., Karpov I. V., Pavlov A. V., Zhilkashinova A. M., Lyamkin A. I.
Probe microscopy of resistive switching in nanocrystalline copper oxide (Cu_xO)

1791

Matyukhov V. V., Makarova M. V., Salamatov Yu. A., Proglyado V. V., Tolmacheva E. A., Kravtsov E. A.
Hydrogenation of gadolinium thin films with a functional layer of niobium

1798

O.I. Lubenchenko, A.V. Lubenchenko, D.S. Lukyantsev, D.A. Ivanov, I.V. Ivanova, O.N. Pavlov
Layer-by-layer chemical and phase analysis of ultrathin niobium nitride films

1805

Gurovich B. A., Goncharov B. V., Prihodko K. E., Stolyarov V. L., Kutuzov L. V., Goncharova D. A., Malieva E. M., Dementyeva M. M., Golubev G. U., Frolov A. S.
Production of ultra-thin superconducting films from NbN by cathode sputtering at substrate temperatures 20 °C--120 °C

Experimental Instruments and Technique

Prikhodko K. E., Dement'eva M. M.

High-energy electron beam induced changes in the atomic composition of materials in the TEM

1824

N.V. Zagaynov, S. A. Garakhin, S.S. Morozov, V.N. Polkovnikov, N. I. Chkhalo

Recovery of EUV optical constants of thin films using laboratory reflectometry data

1834

Reunov D.G., Akhsakhalyan A.D., Glushkov E.I., Dolbnya I.P., Zabrodin I.G., Kaskov I.A., Malyshev I.V., Mikhailenko M.S., Petrakov E.V., Pestov A.E., Polkovnikov V.N., Chernyshev A.K., Chkhalo N.I.

Kirkpatrick-Baez focusing system for synchrotron applications

1841

E. I. Glushkov , A. A. Akhsakhalian, P. A. Veprev , I. G. Zabrodin , M. V. Zorina , I. V. Malyshev , M. S. Mikhailenko , A. E. Pestov, E. V. Petrakov , R. S. Pleshkov, E. S. Antyushin, V. N. Polkovnikov, D. G. Reunov, A. B. Ulasevich , A. K. Chernyshev , N. I. Chkhalo , R. A. Shaposhnikov, Ya. V. Rakshun, Yu. V. Khomyakov , V. A. Chernov, I. P. Dolbnya

Double-mirror monochromator for 4+ generation SKIF synchrotron

1850

Khomyakov Yu.V., Meshkov O.I., Nazmov V.P., Rakshun Ya.V., Chernov V. A., Chkhalo N.I.

Electron beam diagnostics using hard X-rays at the SRF SKIF"

1860

E.I. Glushkov, I.V. Malyshev, A.I. Nikolaev, E.V. Petrakov, N.I. Chkhalo, R.A. Shaposhnikov

Automated system for measuring the surface shape of large flat and cylindrical mirrors using a Fizeau type interferometer

1871

Публикация материалов Симпозиума завершена.

Газы и жидкости

Gumerov F. M., Zaripov Z. I., Nakipov R. R., Mazanov S. V., Sagdeev A. A.

Highly efficient supercritical fluid extraction process: solubility and pseudosolubility

1881

Plasma

L.M. Portsel , Yu.A. Astrov , A.N. Lodygin , Beregunin E.V.

Three-electrode gas-discharge system --- plasma-chemical microreactor

1896

Solid State

Martinson K.D., Murashkin A.A.

Photocatalytic and magnetic properties of zinc ferrite nanoparticles

1904

Slyadnikov E.E., Turchanovsky I.Yu.

Electroplasticity model for amorphous metal alloys

1911

Physical Electronics

M.A. Yamschikova, V.G. Rogachev, A.P. Shkurinov

Rubidium-based multilayer mirrors for soft X-ray radiation

1919

Experimental Instruments and Technique

Cherkun A. P.

The principle of mechanical amplification for piezoelectric force sensors

1926

Naumkin V.S., Gorbachev M. V.

Simulation of thermally induced deformations of silicon mirrors of synchrotron radiation sources

1936
