Technical Physics, 2026, volume 71, issue 1

Atomic and Molecular Physics

Shunaev V.V., Petrunin A.A., Ushakov A.V., Glukhova O.E.

Exploring electron-energetic properties of composite films based on graphene, $\text{LiTi}_2(\text{PO}_4)_3$ and $\text{Li}_3\text{V}_2(\text{PO}_4)_3$ by first-principle methods

3

V.A.Kartoshkin

Shift of the magnetic resonance frequency in collision of atoms with electron spins $S = 1$

8

Gases and Liquids

I.Sh. Garifullin, S.U.Fazletdinov, Pityuk Yu.A., Batyrshin E.S.

Experimental and computational microfluidics for studying the characteristics of oil displacement in porous media

15

Polyakov S. V., Kudryashova T. A., Tarasov N. I.

Computer simulation of hydrocarbon liquid flow for the synthesis of petrochemical products

22

S.I. Koshoridze

Effect of nanoscale hydrophobic droplet inclusions on the cavitation threshold in water

28

Plasma

Kuzmin M.V., Pilyugin I. I.

Application of the Morse potential to describe desorption processes from two-dimensional adsorbed layers

34

Sharapov N.A., Malanichev S.E., Traubergs V.Y., Belev A.S., Korepin D.V.

Investigation of high-frequency pulsed discharge in air using high-speed video recording

40

Bogdanov A.A., Stolyarov I.I.

Spectral diagnostics of plasma in a cesium lamp with a pulse-periodic discharge

47

Khalilullin R.R., Kuzmenko V.O., Miakonkikh A.V.

Optimization of ion etching processes in micro- and nanoelectronics by influencing on the energy spectrum of ions

56

Solid State

Postelga A. E., Igonin S. V. Calculation of effective dielectric permittivity and electrical conductivity of composites containing conductive oriented filaments	69
Tereshina I.S., Kaminskaya T. P., Aleroev A. A., Karpenkov A. Yu. Atomic force microscopy of nanostructured multicomponent alloys (Tb,Dy,Gd)Co₂	89
Physical Science of Materials	
S. A. Karandashev, A. A. Klimov, R.E. Kunkov, V.N. Lomasov, T. S. Lukhmyrina, B. A. Matveev, M. A. Remennyi, E.I. Shabunina, N.M. Schmidt Radiation tolerance of ATR sensors based on p-InAsSbP/n-InAs double heterostructures irradiated by gamma-rays	98
Alhmedov A. K. , Murliev E. K. , Asvarov A. Sh. Spark plasma sintering of In₂O₃-based ceramic targets	107
R. K. Belkheeva On equations of state of nickel and a nickel-aluminum mixture at high pressures	114
Solid State Electronics	
Kucherik A.O., Kononenko T.V., Samyshkin V.D., Chernikov A.S. , Kharkova A.V. , Bukharov D.N. Laser-induced plate-lamel graphitised structures in cvd diamond as promising radiation sensors	124
Physics of Nanostructures	
Kuznetsov Yu. M., Dorokhin M. V., Demina Polina Borisovna, Baidus Nikolay Vladimirovich, Zdoroveyshchev Anton Vladimirovich Thermoelectric properties of InGaAs/GaAs quantum dots	134
Photonics	
Podzyvalov S.N., Kalygina V.M., Lysenko A.B. Photoelectric properties of amorphous Ga₂O₃, films doped with phosphorus and selenium	146
Radiophysics	
Galyamin S. N., Klimov I. A., Grigoriev S. G., Tyukhtin A. V. Band-pass filter for Cherenkov radiation	152

Physical Electronics

Gordeeva A. I., Petukhov M. I., Petukhov I. V., Kornilicyn A. R., Myasnikova E. V., Masalkin D. N.

The features of the proton exchange process during the formation of planar waveguides on lithium niobate crystals in the presence of thermogravitational convection

162

Experimental Instruments and Technique

Kulish M. I., Karabulin A. V., Matyushenko V. I.

Study of pulsed laser ablation products by optical probing

173

Andreev E. V., Apel P. Y., Bublikova T. M., Zasavitskiy I. I., Konovalova N., Okateva N. M., Polukhina N.G., Setkova T. V., Starkov Nikolay, Starkova E. N., Chernyavskiy M. M., Shchedrina T. V.

Testing natural and synthetic micas as detectors of accelerated heavy ions

180
