REVIEW

Сейдгазов Р.Д., Мирзаде Ф.Х., Gladush G.G.

Deep penetration of metals by concentrated energy fluxes (a review)

389

Theoretical and Mathematical Physics

Simakov E. S., Tyukhtin A. V.

Low-frequency transition radiation of particle bunch on grid screen

411

Savenko O. V., Kuznetsova I. A.

High-frequency conductivity of a metal nanolayer taking into account the size quantization effects and conductor band structure anisotropy

420

Gases and Liquids

Arzhannikov A.V., Samtsov D.A., Sinitsky S. L., Starostenko D. A., Makarov M.A., Grigoriev A.N., Lubenchenko N.A.

Dynamics of pulsed gas filling of an extended cylindrical tube

430

Kashevarov A. V., Stasenko A. L.

Hydrothermodynamics of water film, rivulets, and droplets on the surface of a streamlined body applying to the problem of icing

440

Ryabinin A. N., Ivanov M. I., Danilov A. V.

Oscillations of a suspended cylinder with stabilizer in the air flow

447

Plasma

M. M. Stepanov

Portable properties of low-temperature thermochemically nonequilibrium plasma

455

A.S. Sazonov, I.V. Mursenkova

Effects of supersonic flow on pulsed surface sliding discharge characteristics

463

V.G. Brovkin, P.V. Vedenin

Using an energy approach to evaluate the parameters of a resonant microwave plasma channel

469

Kuznetsov V. I., Koyokin V. Yu., Bakaleinikov L. A.

Nonlinear oscillations in a Bursian diode with a time-dependent external voltage

475

Makarova S.V., Subbotin D.I., Snetov V.N., Popov V.E., Pavlova E.A., Kolikov V.A.

Study of aqueous dispersions of nanoparticles obtained by pulsed discharge in bidistilled water

486

Solid State

Petrov P. O., Savinykh A. S. , Garkushin G. V., Zhukov I. A., Kozulin A.A., Razorenov S. V.

Dynamic properties of heavy concrete grade B45 under shock loading

495

Filippov D.A., Sapel'nikov S. O., Jitao Zhan

Magnetoelectric characteristics of the structure amorphous alloy AMAG/lead zirconate titanate/amorphous alloy AMAG

502

Kosenkov D. V., Sagadeev V. V.

Correlation between Emissivity and Heat Capacity of Period 4 d-Metals

509

Physical Science of Materials

Petrov A. I., Razuvaeva M. V.

Effect of Internal Stresses on Copper Creep

515

Radkevich E.V. , Ragutkin A.V., Stavrovsky M.E., Sidorov M.I., Vasilyeva O.A., Kravchenko I.N.

Mathematical modeling of the process of cold sintering of ceramics under pressure

522

Antonov N. N., Kuzmichev S. D., Platonov M.D., Serov A.O.

Laser evaporation of cerium-yttrium complex oxide targets for plasma component separation applications

530

Solid State Electronics

Seleznev M. E., S.L. Vysotskii, Amakhanov G. M., Nikulin Y. V.

Inverse spin Hall effect in structures based on yttrium iron garnet films with reduced saturation magnetization

539

Sukhorukov Yu. P., Telegin A. V., Zonov R.G., Mikheev G.M.

Broadband infrared radiation detector based on laser-induced graphene

546

Physical Electronics

Makaruk K.S., Miroshnikov B. N., Barinov A.D., Popov A. I., Miroshnikova I.N., Patsaev T.D., Vasiliev A.L., Goryachev A.V, Maskaeva L. N.

Influence of ammoniou iodide precursor on the structures and lifetime of charge carriers in the lead sulfide photosensitive elements

554

Gordeev K. M., Koptyaev A. I., Pakhomov G. L.

Effect of substrate temperature on the morphology and photoelectric properties of thin films of the molecular semiconductor subphthalocyanine boron chloride

564

Experimental Instruments and Technique

Egorov S. V., Ereemeev A. G., Rybakov K. I., Sorokin A. A., Kholoptsev V. V.

Optical measurements of shrinkage and temperature distribution during microwave sintering

577

Verhoglyadov A. E.

Experimental study of transverse vibrations of a fuel rod of a pulsed reactor

584

Beletsky A.B., Taschilin M.A., Yakovleva I.P., Devyatova E.V., Podlesny S.V., Vasiliev R.V., Tatamikov A.V., Lebedev V.P.

Estimating atmospheric transparency during darkness based on data from all-sky cameras with a narrow spectral range

591
