

TECHNICAL PHYSICS

С.-Петербург
ФТИ им. А.Ф. Иоффе

Technical Physics, 2025, volume 70, issue 6

Theoretical and Mathematical Physics

M.V. Davidovich

Tunneling and thermionic-field emission current in diode metal-isolator-metall

1011

Gases and Liquids

Yakovlev V. I., Korotaeva T. A.

Model of jet plasma flow with absorption of a CO₂-laser pulse

1025

Shalybkov D.A.

Maximum eigenfrequency of axisymmetric disturbances of rotating fluid

1038

Zubarev N. M., Zubareva O. V.

Propagation of finite amplitude waves along a cylindrical jet of magnetic fluid in an axial magnetic field

1042

Dubinov A. E.

Barometric distribution of gas density obeying the Lorentz equation of state

1049

Plasma

Razhev A.M., Churkin D.S., Tkachenko R.A.

Neon laser with wavelength $\lambda = 585.3$ nm pumped by pulsed inductive longitudinal discharge

1053

Solid State

Baryshnikov S. V., Milinsky A. Yu., Stukova E. V.

Methodology for studying polarization noise in ferroelectric materials and its application to barium titanate

1060

Physical Science of Materials

Vas'kovskiy V. O., Bykova A. A., Gorkovenko A. N., Kulesh N. A., Lepalovskij V. N., Kudyukov E. V., Selezneva N. V.

Thermally initiated modification of the structure and magnetic properties of Ta/Ni and FeMn/Ni film nanocomposites

1065

Sukharina G. B., Gladchenko-Djevelekis Ya. N., Ermakova A. M., Kulaev K. D., Pryadchenko V. V., Ponosova E. E., Babayants A.S., Avakyan L. A., Bugaev L. A.

Structure of copper centers in zeolite-mordenite at the activation stage according to XAFS and computer modelling data

1073

Solid State Electronics

Vostokov N. V., Drozdov M. N., Kalinnikov M.A., Kraev S. A., Lobanov D. N., Yunin P.A.

Schottky diodes based on monocrystalline Al/AlGa_N/Ga_N heterostructures for zero-bias microwave detection

1080

Chumak M.A., Kalinina E.V., Zabrodskii V. V.

Modeling of processes of irradiation of Cr/4H-SiC structures with high-energy Ar ions

1089

A.E. Kalyadin, D.S. Polyakov, V.P. Veiko, N.A. Sobolev

Luminescence centers in silicon irradiated by femtosecond laser

1095

Matveev A. A., Arkhipova O. Yu., Reshetova E. V., Safin A. R., Kravchenko O. V., Nikitov S. A.

Non-isochronicity of ferromagnetic nanoparticles of various shapes in a magnetic field

1100

Physics of Nanostructures

Bunin M. A., Yorshin V. A., Chumachenko K. S., Raevskii I. P.

Electric potential of micro-sized blocks at the NaNbO₃ film surface

1106

Photonics

Artemov D.E., Buchinskii A. V., Smirnov A. P., Ershov A.A., Nikitin A. A., Ustinov A. B., Treshikov V. N., Fedoseev A. I.

Quality Factor of Micro-ring Resonators: Calculation Method and Experiment

1112

Electrophysics

Sakharov V. Yu., Tikhonov A. A.

The gradient descent method in the problem of charge distribution over the surfaces of three concentric tori

1120

Physical Electronics

Bogachev R. Yu., Krachkovskaya T. M., Shesterkin V. I., Zhuravlev S. D., Glukhova O. E., Kolosov D. A.

Factors determining parasitic thermionic current in cathode-grid units with pyrographite grids

Rybina N. V., Rybin N. B., Khilov V. S., Tregulov V. V., Ivanov A. I., Aiyyzhy K. O., Melnik N. N. Optical properties of porous silicon irradiated with a nanosecond ytterbium laser	1130
	1136
Physics for Sciences of Life	
Burmistrov I.A., Gribovsky S.L., Trushina D.B. Magnetic nanoparticles dynamics modeling in the shell of polyelectrolyte capsules in a low-frequency magnetic field	1143
