

TECHNICAL PHYSICS

С.-Петербург
ФТИ им. А.Ф. Иоффе

Technical Physics, 2025, volume 70, issue 7

Gases and Liquids

Matveev I.S., Morozov S.O., Lukashevich S.V., Shiplyuk A. N.

Numerical investigation of the effect of tangential helium injection on the linear stability of a compressible boundary layer on a flat plate

1187

Plasma

Charikov Yu. E., Shuvalova V. I., Sklyarova E. M., Shabalin A. N.

Resolving the Spatial Configuration of X-ray Spikes in Magnetoactive Plasma: The July 3, 2017 Solar Flare

1195

V. E. Guseva, I. G. Zabrodin, A. N. Nechay, A. A. Perekalov, N. I. Chkhalo

Absorption of laser radiation energy in the laser-plasma radiation source with gas-jet targets

1206

A. N. Nechay, V. E. Guseva, A. A. Perekalov, N. I. Chkhalo

Calculated and experimental determination of a laser spark length in the gas-jet targets

1212

Stepanov L.V., Antsiferov P.S., Matyukhin N.D.

Damped vacuum discharge as a variant of EUV radiation source for lithography

1220

Solid State

R.K. Belkheeva

Simple equation of state to describe behavior of solid and porous aluminum samples under impact compression and isentropic unloading

1226

Kosenkov D. V., Sagadeev V. V.

Thermal Emission of Selected Refractory Metals

1236

A.V. Utkin, V.M. Mochalova, A.V. Savchenko, V.E. Breykina

Shock compressibility and spall strength of the composite based on Kevlar and the epoxy resin

1242

M. F. Akhmatnabiev, M. V. Timoshenko, M. M. Syrov, A. A. Petrov, S. V. Diachenko

Prospect of application of gradient cellular structures with controlled permittivity for 3D-printing of the Luneburg lens

1250

Nevskii S.A., Konovalov S. V., Bashchenko L. P., Gromov V. E., Mikhailov D. D., Granovskii A. Yu.

Effect of electric fields on the formation of solid phase nuclei in metal melts

1257

Physical Science of Materials

E.A. Lantsev, N.V. Malekhonova, A.V. Nokhrin, K.E. Smetanina, A.A. Murashov, A.V. Voronin, Yu. V.

Blagoveshchenskiy, A.V. Terent'ev

Electropulse ("sparking") plasma sintering of fine-grained W + 10 %Ni tungsten alloys

1268

Pavlenko V. I., Kashibadze V. V., Ruchii A. Yu., Serebryakov S. V., Sidelnikov R. V.

Simulation of the interaction of accelerated electrons with an energy of 1-10 MeV with a radiation-protective polymer composite

1277

Glazunova E. V., Zorin D. I., Andryushina I. N., Shilkina I. A., Nagaenko A. V., Makarev D. I., Verbenko I. A.,

Reznichenko L. A.

Effect of mechanical activation on the internal structure and macroresponses of a lead-free multicomponent material based on alkali metal niobates

1288

Tursunov M., Dekhkonov A., Abdurakhmanov G., Ksenevich V., Tashmukhamedova D. A., Vokhidova G., Rai Ditya Prakash

Effect of strain on thermoemf in the silicate glass doped with ruthenium dioxide

1295

Solid State Electronics

Chigarev S. G., Vilkov E. A., Byshevski-Konopko O. A., Panas A. I., Fomin L. A., Malikov I. V.

The nature of terahertz radiation in magnetic nanojunctions when current flows through them

1304

Zykov V. M., Evdokimov K. E., Neyman D. A., Vladimirov A. M., Voronova G. A.

Mechanism of local damage to photovoltaic cells by geomagnetic plasma electrons

1311

Kalmykov D. A., Aliev V.Sh., Bortnikov S.G.

Synapse-resistor based on semiconductor-metal transition in vanadium dioxide

1322

Radiophysics

Ignatjev V.K., Perchenko S.V., Stankevich D.A.

Model of intrinsic anomalous Hall effect in polycrystalline ferromagnets

1329

Anishchenko S.V., Gurinovich A.A.

Scattering of electrons by the anode mesh in virtual cathode oscillators

1337

Bordonskiy G. S., Kazantsev V. A.

Broadband measurements of dielectric characteristics of ice near 0 °C temperature

1344

Experimental Instruments and Technique

Sevryukova A. N., Chuprunov E. V., Kim E. L., Naumov A. A., Gribko V. V., Prokhorov A. P.

The influence of the materials used in the crystallizer on the rapid growth of monosectoral large crystals of the KDP type

1351

Комментарии

Amendment to the article ANOMALOUS RESPONSE OF THE STRATIFIED MEDIUM TO VOLUME HEAT RELEASE I.Kh. Ingel'. ZhTF 93 (2), 202 (2023).
