REPORT

The synthesis of enantioenriched α -hydroxy esters

pp 1573–1580

Xin Gu*, Lan Wang, Yong-fei Gao,
Wei Ma, Ya-ming Li, Pin Gong

In this review, the synthesis of α -hydroxy esters with moderate to excellent yields and stereoselectivities is discussed through the various synthesis reactions, mainly including heteroatom rearrangements, carbonyl-ene, oxidation of β -keto esters, reduction of α -keto esters, kinetic resolution, and glycolate alkylation (arylation).
